Medpage Limited T/A Easylink UK, established 1984, is a BSI registered company manufacturing quality care aid alarms. We have a vast experience in providing solutions for unusual alarm requirements. For people with special needs, our range of products meet with performance demands, ease of use and durability.

Ordering. Very simple. If you do not have an account with us (accounts are automatically granted to Local Authorities and NHS customers) every product page has a web link that you can type into your web browser. There, you will be able to order the product on-line. Alternatively, you can phone and one of our sales staff will help you with your order over the phone and take payment by debit or credit card.

Guarantee. All our products are supplied with a manufacturers 12 month warranty (some have 36 months) and are usually serviced in-house by our trained engineers. For warranty repairs or replacement, you simply return the item to us quoting your delivery or invoice number. We will return the item to you at our cost.

Delivery. To ensure prompt safe delivery of your order, we operate a simple carriage charge system. Singular items under £70.00 are send by Royal Mail at a charge of £4.40. Items over £70.00 are sent by UPS or other recognised courier at a charge of £9.25.

As a company we pride ourselves, and our customers agree, that we consider the requirements of our customers very highly. Our service, product development and technical support is second to none. Our service team are trained not only in the manufacture of the product but how they are supposed to work. So you can rest assured, if you call for assistance, you will speak to some one that knows what they are talking about and are able to help with any technical issues you may have. After all, we are not all geniuses where technology is concerned.

Medpage Limited are BSI accredited to the highest level and maintain registration through annual BSI audits to ISO EN 13485:2003 and ISO EN 9001:2008. Our monitors are designed and manufactured in accordance with the medical directive EEC 93/42/EEC as amended by 2007/47EC and carry BSI CE mark based on Annex V for manufacture and quality assurance.

Medpage nocturnal epileptic seizure detecting monitors are designed to detect convulsive seizures from a sleeping person. This is achieved using a sensor positioned under the patients mattress. Depending on the type of bed, mattress, and the size and weight of the person, Medpage monitors will successfully detect most convulsive seizures. Each monitor model has a means of adjusting the sensitivity of the sensor to compensate for the variables detailed above. All models also have an adjustable delay control to allow a period of non-seizure movement with no alarm. Turning over or adjusting sleeping position as examples.

During a convulsive seizure, body movements are detected by the sensor from under the mattress. A microprocessor analyses the frequency of movements to determine if an alarm should be raised. Response times can be very quick from 5 seconds to 20 seconds depending on the alarm delay setting.

When considering making a purchase of a seizure monitor it is very important to consider safety for the patient. It is virtually impossible to guarantee that a monitor will detect all seizures from all patients, especially younger lighter patients. Generally for teenagers and adults all models will detect convulsive seizures. However, a simple test of a monitor with a patient on their bed will quickly establish if a monitor is suitable and safe for monitoring. We offer a 28 day money back guarantee on all models to allow a reasonable test period.

The table below provides a basic guide for minimum age and body weights.

Model	Minimum Age	Minimum Weight	Seizure Detection	Apnoea Monitoring	Alarm Type
MP5	1 YEAR	18lb 8.16Kg			2 X PAGER
MP5-NC	1 YEAR	18lb 8.16Kg			NURSE CALL + PAGER
MP5V2	3 MONTHS	9lb 4Kg			2 X PAGER, NURSE CALL
MP5V3	3 MONTHS	9lb 4Kg			DESKTOP RECEIVER
MP2	1 YEAR	18lb 8.16Kg			4 CHANNEL PAGER

Medpage MP5 Convulsive Seizure Detector

The Medpage MP5 incorporates a bed sensor for convulsive seizure detection and is equipped with a microphone for the detection of aural sounds. Three simple controls provide bed sensor and microphone sensitivity and movement alarm delay. The sensor is positioned under the patients mattress. Should seizure activity begin, the sensor detects the abnormal movement. When the movement has continued beyond the delay setting an alarm is generated. The built in microphone is to detect aural sounds such as choking, grunting or screams etc. Detected sounds will cause an alarm. The MP5 is equipped with a transmitter that sends an alarm signal to a radio pager. The MP5 is supplied with two radio pagers. The MP5 provides reliable seizure detection at an affordable price and is suitable for domestic and professional care use.

The MP5 is available with dual bed sensors (MP5-TWIN). The MP5-TWIN would only be necessary where a person of low body mass (under 60lb 27Kg) is sleeping in a double size bed, or for a small child sleeping in a standard divan bed (single). Check suitability table.

- **MONITOR DIMENSIONS: L 150MM W 105MM D 45MM**
- **MP5-TWIN (TWO SENSORS) HAS 2 X BED SENSORS AND AUDIO MICROPHONE**
- **SEIZURE DETECTED LED LIGHTS TO WARN OF A DETECTED SEIZURE**
- **POWERED BY 12V POWER ADAPTOR WITH BATTERY BACKUP**
- **POWER STATUS AND MOVEMENT DETECTION LED'S**
- **MOVEMENT SENSOR: LEAD LENGTH 3M**
- **SENSOR DIMENSIONS: L75MM W 55MM D 25MM**
- **SILENT ALARM, NO INTERNAL SOUNDERS.**
- **INTERNAL OUTPUT CONNECTOR FOR LINKING TO AUTO DIALLER OR NURSE CALL SYSTEM**

ORDER CODE MP5 PRICE £205.00 + VAT (£246.00)

ORDER CODE MP5-TWIN PRICE £215.00 + VAT (£258.00)

<http://www.easylinkuk.co.uk/page6.html>

Medpage MP5-NC

Seizure monitor for the detection of nocturnal convulsive seizures with switched output to nurse call system, community alarm, AD11+ telephone auto dialler or cable connected alarm sounder such as the CTM-2 Voice Alarm.

The Medpage MP5-NC is suitable for use in nursing, care homes, or hospitals where a nurse call system is installed. Upon detection of a convulsive seizure an internal relay is activated to produce a clean contact switched output via a suitable connection lead.

- **SUPPLIED WITH STANDARD NURSE CALL CONNECTION LEAD USING MONO 1/4" JACK PLUGS**
- **STANDARD LEAD LENGTH 2M**
- **MONITOR ENCLOSURE DIMENSIONS: L 150MM W 105MM D 45MM**
- **POWER REQUIREMENT: 12V DC VIA POWER ADAPTOR**
- **BATTERY BACKUP 9.6V ON BOARD BATTERY**
- **BATTERY BACKUP TIME IN EXCESS OF 48 HOURS**
- **VISUAL INDICATORS: POWER, POWER FAIL, MOVEMENT DETECTION.**
- **CAN BE USED WITH CABLE CONNECTED ALARM**
- **OPERATING CONTROLS: TWIN SENSOR SENSITIVITY ADJUSTMENT, VARIABLE ALARM DELAY**
- **MOVEMENT SENSOR: LEAD LENGTH 3M,**
- **SENSOR DIMENSIONS: L75MM W 55MM D 25MM**
- **RELAY SWITCHING MAX 1 AMP**
- **N/O & N/C CONTACT OPTIONS**

The MP5-NC, can be used where bed occupancy detection is also required. Used in conjunction with the Rondish RCG-1 bed leaving alarm, both seizure detection and bed exit would be notified to a common pager alarm.

ORDER CODE MP5-NC PRICE £165.00 + VAT (£198.00)

ORDER CODE MP5-NCTWIN PRICE £185.00 + VAT (£222.00)

<http://www.easylinkuk.co.uk/page8.html>

Medpage MP5V2

The MP5V2 uses patented technology owned by Medpage Limited to provide bedtime convulsive seizure detection for all ages (refer to suitability table). The Medpage MP5V2 utilises a high specification microprocessor to analyse sleeping movements (including movements indicative of breathing) of a patient. Typical convulsive seizure activity detected by the advanced sensor is recognised by the system software resulting in alarm generation. The MP5V2 is supplied with 2 x alarm pagers. Simple controls are provided for movement detection sensitivity, alarm delay, and for integral microphone used to detect vocalizations proceeding or during a seizure. No alarm for cessation of breathing.

- **MP5V2 NOCTURNAL CONVULSIVE SEIZURE DETECTOR**
- **ALARM TO PAGER/NURSE CALL/CALL CENTRE**
- **COMPUTERISED MOVEMENT ANALYSIS & CONTROL**
- **SUITABLE FOR MOST BED TYPES**
- **UNDER-MATTRESS SENSOR, PATIENTS 4 KG UPWARDS**
- **TAMPER PROOF CONTROLS - SYSTEM SELF CHECKING**
- **SYSTEM BATTERY BACKUP - FAULTS REPORTED TO ALARM PAGERS**
- **PATENTED BRITISH TECHNOLOGY GB2431998**
- **INTERNATIONAL APPROVALS & AVAILABILITY**
- **36 MONTH WARRANTY**

The MP5V2 can record and store two different bed/patient set up settings. This is useful when a patient moves from one bed to another, or from one location to another. Each setup configuration is indicated by a different coloured LED. Bed sensor sensitivity, Microphone sensitivity and delay control settings are stored. Manual adjustment of all settings can only be performed in set up mode, and is therefore tamperproof.

ORDER CODE MP5V2 PRICE £319.16 + VAT (£382.99)

<http://www.easylinkuk.co.uk/page17.html>

Medpage MP2 Seizure Monitor 1 - 4 Patients

The MP2 is equipped with a transmitter that sends an identification signal to a radio alarm pager. The pager can identify up to four individual bed monitors, identified with a vibration and tone alarm and a coloured channel LED that stays lit until the alarm is cancelled. The pager can be used with a plug in pillow vibrator pad for nighttime seizure alerts. The MP2 transmitter has a range of 100 Metres and can be extended using signal repeaters if required.

- **MONITOR DIMENSIONS L 150MM W 105MM D 45MM**
- **MP2-TWIN IS EQUIPPED WITH 2 X BED SENSORS AND AUDIO MICROPHONE**
- **SEIZURE DETECTED LED LIGHTS TO WARN OF A DETECTED SEIZURE**
- **POWERED BY 12V MAINS POWER ADAPTOR WITH BATTERY BACKUP**
- **POWER STATUS AND MOVEMENT DETECTION LED'S**
- **MOVEMENT SENSOR: LEAD LENGTH 3M**
- **SENSOR DIMENSIONS:
L75MM W 55MM D 25MM**
- **SILENT ALARM, NO INTERNAL SOUNDERS**
- **INTERNAL OUTPUT CONNECTOR FOR LINKING
TO AUTO DIALLER OR NURSE CALL SYSTEM**

SINGLE BED SENSOR MODEL - ORDER CODE MP2

PRICE £176.00 + VAT (£211.20)

TWIN BED SENSOR MODEL - ORDER CODE MP2-TWIN

PRICE £186.00 + VAT (£232.20)

ELVP-4 Four-Channel Vibration Alarm Pager.

The ELVP-4 is a robust, compact (H 95mm W 55mm D 18mm and weight 83g including the battery) rechargeable alarm pager. When signalled by an MP2 monitor, the internal vibration alert activates. A corresponding coloured LED lights to identify active seizure monitor. Low battery/recharge warning.

The ELVP-4 pager can be used with an optional plug in pillow shaker. This is to provide an alert for deaf or hard of hearing carers or to provide a silent alarm.

4-CHANNEL VIBRATION ALERT PAGER

ORDER CODE ELVP-4 PRICE £76.00 + VAT (£91.20)

PLUG IN PILLOW SHAKER (VIBRATING DISK)

ORDER CODE VIB-PAD PRICE £12.00 + VAT (£14.40)

FAS-2 Programmable Fall Alarm With SOS Button

FALL SENSORS

The FAS-2 is a multi-function product with dual fall detection sensors. The sensors are controlled by software that provides four modes of fall detection.

1. SUDDEN DROP
2. TILT FROM VERTICAL TO HORIZONTAL
3. SLUMP FALL
4. ABNORMAL PROLONGED MOVEMENT AFTER A FALL INDICATIVE OF AN EPILEPTIC SEIZURE

SOS

The FAS-2 has an SOS button that can signal the MPPL pager for in-house carer fall alert, or can trigger our AD-01 telephone dialler or any other device programmed to receive signals.

LIGHTING/APPLIANCE ON/OFF

The FAS-2 is equipped with two buttons that can be used to control HomeEasy remote control products, such as lighting or electrical appliances from the wall socket.

VIBRATION ALERT

If the fall alarm is activated an integral vibration alert operates to warn the user. This feature substantially reduces false alarms especially when used with a telephone auto dialler. Additionally, the vibration alert operates as a reassurance indication when any of the buttons are pressed. Essential for people with dual sensory loss.

The device is housed in our 4-channel key fob case so as not to appear labelling in any way, a reason identified recently why people fail to use some fall alarms available. With the added features of SOS and remote control, a person at risk from falls is more likely carry it around as it has use for them.

- POWER: 1 X CR2032 LITHIUM BATTERY
- TRANSMITTER FREQUENCY 433.92 MHZ*
- SOS/PANIC BUTTON
- VIBRATION ALERT FOR FALL ACTIVATION & FOR BUTTON PRESSES.
- LOW BATTERY WARNING (VIBRATION & TRANSMITTED SIGNAL)
- TAMPER PROOF SETTINGS ACCESS
- TRANSMITTER RANGE UP TO 200M

ORDER CODE FAS-2 PRICE £125.00 + VAT (£150.00)

Nanny (BM-02) Apnoea Monitor - Cessation Of Breathing Alarm

The Nanny BM-02 is designed to monitor the breathing movements of a sleeping person. A sensor sheet measuring 550mm x 350mm x 15mm is positioned under the mattress. The sensor is connected to a monitor that analyses the tiny chest movements created by breathing. If less than 8 breaths per minute are not recorded the alarm will sound. Additionally, if breathing movements are not detected for a period exceeding 20 seconds, the alarm will sound. When the alarm is activated it must be reset at the monitor to acknowledge the alarm. The Nanny BM-02 has LED's that indicate: confirmation of breathing detected, low battery warning and sensor fault.

The sensor is enclosed in a washable vinyl pocket where normal strength disinfectant may be used should the sensor become soiled. The sensor has a two metre connection lead with a 5 metre extension lead supplied to enable positioning of the monitor alarm outside of the patients room.

The Nanny BM-02 is also suitable for people with medical conditions that may cause cessation of breathing including; destructive sleep Apnoea (snoring) babies at risk from cot death (SIDS) people with Epilepsy at risk from SUDEP. Certified medical device.

ORDER CODE BM-02 PRICE £98.46 INC VAT UK DELIVERY £6.40

Multi-Function Enuresis Monitor

EnuSens™ is designed to offer a range of enuresis monitoring solutions to aid care of the elderly, disabled people and children requiring bed wetting training, and vomit detection. EnuSens™ uses a cotton blend soft fabric enuresis sensor (750mm x 450mm) that is suitable for bed, chair or wheelchair use. The sensor can also be used inside a pillowcase for vomit detection. The enuresis sensor can be boil washed and tumble dried. Soiled sensors are quickly changed with the stainless steel press-clip connectors.

- **ADULT INCONTINENCE SENSOR MONITORING ALARM**
- **CHILD BED WETTING TRAINER**
- **USE FOR BED - CHAIR - WHEELCHAIR**
- **VOMIT DETECTION INSIDE PILLOW CASE**
- **WATER LEAK/OVERFLOW ALERT FOR BATHS ETC**

ALARM CONNECTION OPTIONS:

- **INTEGRAL BEEPER WITH VOLUME CONTROL**
- **SILENT ALARM FOR USE WITH PAGER ALARM**
- **NURSE CALL CONNECTION VIA RELAY OUTPUT**
- **CONNECTION TO TELEPHONE AUTO DIALLER**

FEATURES GENERAL SPECIFICATIONS:

- **POWERED BY 3 X AAA BATTERIES OR DC ADAPTOR**
- **MACHINE WASHABLE SOFT ENURESIS SENSOR**
- **TUMBLE DRY SAFE**
- **STAINLESS STEEL SENSOR CONNECTORS**
- **RELAY OUTPUT SOCKET WITH C, N/O N/C**
- **MOISTURE SENSITIVITY CONTROL**
- **SENSOR INPUT SOCKET**
- **POWER STATUS LED WITH LOW BATTERY ALERT**
- **ALARM ACTIVE INDICATOR LED**
- **MONITOR VOLUME CONTROL SWITCH**
- 85DB, 75DB, SILENT
- **BATTERY LIFE 12 MONTHS**
- **INCONTINENCE ENURESIS SENSOR:**
750MM X 450MM CONNECTOR LEAD 1M
- **MONITOR DIMENSIONS: H 85MM W 57MM D 30MM**
- **WALL MOUNTING OPTION - SCREW OR CORD**
- **SENSORS ARE A NON-RETURNABLE CONSUMABLE**

Low Blood Sugar Alarm - For The Detection Of Symptoms of Hypoglycaemia For People With Diabetes

The HSA-01 can detect the symptoms of Hypoglycaemia, low blood sugar in diabetic people. The HSA-01 is a self contained device that incorporates two sensors located on the rear of the product, styled like a wristwatch. The sensors, when in contact with the skin of the wrist or ankle respond to perspiration and body temperature (cold sweats), two common symptoms of low blood sugar. If a cold sweat is detected, a built in vibrator operates along with a tone beeper alarm. The persistent vibration from the alarm is sufficient to disturb most users from sleep enabling a blood test and remedial action to be taken.

The HSA-01 is for use when sleeping, it is not designed or intended to be used as a daytime alarm. When used in accordance with the instruction guide, the HSA-01 can detect early symptoms of hypoglycaemia and reduce the likelihood of more serious complications.

The monitor has a comfortable adjustable elastic strap that exerts sufficient pressure to hold the sensors firmly against the skin. The product case is manufactured from a durable ABS material that will provide years of service life. The only on-going costs to maintain the product is periodic replacement of the lithium 3V battery, probably twice a year.

Operation of the product is very simple and with confirmation beeps for button operation, is also usable by sight impaired people. By keeping a record of night time alarms, the data can be used to adjust insulin doses to prevent nocturnal hypo's.

Weighs only 17g. Battery, 3V Lithium CR2032. Alarm, piezo buzzer and vibration. Case size, 54mm x 34mm x 14.61mm. Low battery warning tone and vibrate.

Certified in accordance with the medical directive 93/42/EEC.

ORDER CODE HSA-01 PRICE £79.95 + VAT (£95.95)

**NON INVASIVE, DOES NOT PIERCE THE SKIN. PRODUCT GUARANTEED FOR 12 MONTHS.
28 DAY MONEY-BACK GUARANTEE IF THE PRODUCT IS NOT SUITABLE.**

<http://www.easylinkuk.co.uk/page40.html>

Video/Audio Wireless Monitoring Camera System

The Watch & Care 100 wireless video monitoring system uses 2.4GHz transmission, which means the connection between the parent/carer video monitor and the camera is safer and longer in range, transmitting through indoor walls and ceilings. This system is an ideal solution not only to monitor babies/children but also to monitor patients in their rooms, monitoring exit doors etc. It is simple to use yet packed with many useful features including:

Two way communication between the two units. High quality colour display with menu that provides control over the camera unit including; activation of night vision function, brightness / volume control, viewing of the temperature in the monitored room. Camera with day and night vision selection. Power saving function.

MONITOR FUNCTIONS:

2.4" colour LCD display. Monitor unit with vibration alert and adjustable sound levels. Volume control. Two-way intercom function. Brightness control Remotely switch camera night light on/off from monitor. Belt clip. 2.4 GHz- Digital transmission through walls, floors and ceilings. 36 channels.

CAMERA FUNCTIONS:

4 infrared diodes for night vision function. Voice operated (VOX) option to turn on video monitor when sounds detected by camera. Secured transmission – less prone to interference or signal interception by similar systems Camera unit with built in night light. Transmission range up to 150 meters in optimal conditions. Mains or battery power operation.

TECHNICAL DETAILS:

- **MEASUREMENTS (WIDTH X DEPTH X HEIGHT):**
- **MONITOR UNIT: 70 X 30 X 120 MM**
- **CAMERA UNIT: 90 X 75 X 120 MM**
- **CHARGER: 95 X 78 X 45 MM**
- **WEIGHT: MONITOR UNIT: 133 G**
- **CAMERA UNIT: 147 G (WITHOUT RECHARGEABLE BATTERIES / CHARGER)**
- **COLOUR: WHITE / GREY**

ORDER CODE V100 PRICE £83.32 + VAT (£99.99)

Bed & Chair Occupancy Detection Alarms

The BTX-03M, is a professional wireless nurse call transmitter that provides a reliable wireless link to enable various sensors to produce an alarm wirelessly to a radio pager.

THESE INCLUDE:

- (1) BED OCCUPANCY SENSOR
- (2) CHAIR OCCUPANCY SENSOR
- (3) DOOR CONTACT SWITCH
- (4) FLOOR PRESSURE MAT
- (5) NURSE CALL SWITCH
- (6) BREAK BEAM ALARM
- (7) PIR MOVEMENT SENSOR

(#) Refer to photo's shown below

BTXV-03M Wireless Transmitter - With 15 minute alarm delay option.

Transmitter case dimensions H 115mm W 75mm D 20mm. Case material ABS. Wall fixing lugs on rear of case. Transmission frequency 433.92 MHz. Range 200M (open field). Power requirement 9V PP3 or mains 12V DC power adaptor. Low battery warning sound + flashing LED. Built in nurse call button, alarm reset button.

ORDER CODE BTX03M PRICE £46.00 + VAT (£55.00)

Alarm Radio Pager

Alarm pager (PAG-03DV) with vibration only or tone beeper or speaking alarm number for use with multiple (alarm devices). Powered by 2 x AA batteries. Dimensions W 80mm H 60mm D 20mm. Strong belt clip. Low battery warning. Alarm volume control. Alarm display, volume control, review button.

ORDER CODE PAG-03DV PRICE £26.00 + VAT (£31.00)

RCG-1 Bed Alarm Kit - RCG-2 Chair Alarm Kit

These kits offer excellent value for money and reliable performance where a simplistic bed or chair monitoring system is required. Many falls occur in the home and in care when a person decides to leave their bed or chair. These systems provide an early warning via a radio pager that a potential fall victim is on the move. Probably the most popular bed & chair occupancy detection systems sold in the UK.

SENSORS (BED & CHAIR)

Sensors are manufactured in high quality polyvinyl and are fitted with a 2M lead for connection to the monitor transmitter. Normal strength disinfectants can be used to sterilise the sensors if required. Sensors are consumable items. Chair sensor 15" x 12" Bed Sensor 30" x 20".

RCG-1 BED LEAVING ALARM KIT PRICE £95.00 + VAT (£114.00)

RCG-2 CHAIR LEAVING ALARM KIT PRICE £90.00 + VAT (£108.00)

<http://www.easylinkuk.co.uk/page60.html>

Optical Bed Occupancy - Wander Detection Kit

This kit uses a CTM-PIR connected to the BTX- 03M transmitter. A person moving into the detection beam of the PIR causes the transmitter to send a signal to the radio pager. The PIR has two settings: Instant trigger alarm or delayed trigger alarm. The delayed setting produces an instant alarm, the PIR then needs 3 minutes of clear sight before it will re-trigger the transmitter. Useful to prevent continuous alarms when attending to a patient. Connection cables included.

The PIR can be used in conjunction with a bed or chair sensor.

ORDER CODE RCG-3 PRICE £74.99 + VAT (£89.99)

<http://www.easylinkuk.co.uk/page121.html>

RCG-3 KIT (ALL ITEMS SHOWN)

Totally Cordless Bed & Chair Occupancy Alarm

The new cordless bed and chair occupancy monitoring alarm system from Rondish totally eliminates the necessity of cabling connections between sensor, transmitter and alarm receiver unit. The bed and chair sensors have a specially moulded pocket that stores a miniature transmitter. When positioned under the mattress or chair cushion of the patient, there are no visible signs to tempt vandalism or tampering. The sensor transmitter sends signals to the cordless alarm monitor to activate an alarm or notification of faults, including low transmitter battery.

CBP-01

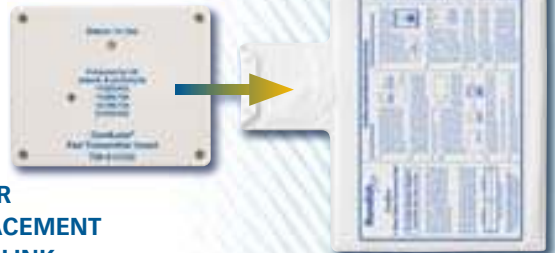

CBM-03

CORDLESS MONITOR ALARM - FEATURES:

- WIRELESS ALARM LINK WITH BED/CHAIR SENSOR TRANSMITTER
- BATTERY (3 X AA) OR MAINS POWER ADAPTOR POWERED
- LOW BATTERY ALERT FOR SENSOR TRANSMITTER AND MONITOR ALARM
- CHOICE OF ALARM TONES WITH VOLUME SETTING
- 6.3MM (1/4") NURSE CALL CONNECTION OUTPUT SOCKET
- POLLING (RADIO SUPERVISION) FROM BED/CHAIR SENSOR TRANSMITTER
- SIMPLE SET UP AND USE
- DESIGNED TO MEET THE REQUIREMENTS OF CARING FOR PEOPLE WITH SPECIAL NEEDS, LEARNING DISABILITIES, AUTISM AND AGGRESSIVE DEMENTIA PATIENTS
- OPERATING FREQUENCY 433.92 MHZ SUPER HETERODYNE RECEIVER
- OPERATING RANGE 100 METRES (OPEN FIELD) FROM SENSOR TRANSMITTER
- HOUSING: 110MM X 77MM X 28MM
- TAMPER PROOF SECURE RESET

TRANSMITTER SPECIFICATIONS:

- POWERED BY 2 X 3 VOLT LITHIUM BATTERIES
- HOUSING: 68MM X 54MM X 10MM
- RED LED TRANSMIT CONFIRMATION LED (DIAGNOSTIC)
- CONNECTOR: MINIATURE CONNECTOR INSIDE PAD POCKET FOR EASY REPLACEMENT
- TAMPER PROOF RADIO CONNECTION LINK

CCP-01

<http://www.easylinkuk.co.uk/page76.html>

CBM-03 CORDLESS BED/CHAIR MONITORING ALARM £61.20 + VAT (£73.44)

CBP-01 CORDLESS BED PAD FOR CBM-03 MONITOR £70.10 + VAT (£84.84)

CCP-01 CORDLESS CHAIR PAD FOR CBM-03 MONITOR £60.80 + VAT (£72.96)

Sensor price includes cordless transmitter and batteries. Note: A maximum of two sensor pads (bed or chair) can be used simultaneously with an alarm monitor CBM-03. Multiple sets can be used within a home or hospital ward.

Voice Alert Bed/Chair Occupancy Detection Alarm

The CTM-2 includes voice recording technology to enable short voice memo's to be recorded. The voice message can be triggered for playback from a variety of sensor devices including: bed occupancy sensor, chair occupancy sensor, floor pressure mat, magnetic door contacts, PIR (CTM-PIR) or any device producing a volt free switched output.

Bed Leaving Alarm Kit (CTM-BKIT)

For a person at risk from falls in the home, this kit provides an effective economical solution. The CTM-2 monitor is used with a CT-3 bed sensor. A message is recorded "Don't get out of bed I will be there to help in a minute". The sensor is positioned under the bed mattress or on top of the mattress depending on the type of bed or persons weight. When the person rises from their bed, the voice monitor plays the recorded message. The patient is more likely to obey instructions from a relative or known voice. The CTM-2 also includes an alarm delay selector switch that provides an option for a 15 minute delay before alarm.

Chair Leaving Alarm Kit (CTM-CKIT)

This kit consists of the CTM-2 voice monitor with a CT-2 chair mat. A message is recorded for alarm playback "Don't get out of your chair Dad, I'll be there in a minute". The chair sensor is positioned under the chair cushion or on top of the cushion depending on chair type. If the person rises from their chair the message is played back.

Add A Pager Alarm (CTM-PAG)

If an alarm is required in another room (carers room) an alarm transmitter with radio pager can be added (CTM-PAG). When the voice monitor alarm is activated, the recorded voice message is played to the patient and a signal is transmitted to the alarm pager. The message may stop the patient from wandering away from their bed or chair giving the carer time to respond when signalled by the pager.

ORDER CODE CTM-BKIT PRICE £53.00 + VAT (£63.60)

ORDER CODE CTM-CKIT PRICE £49.75 + VAT (£59.70)

CTM-PAG

MFT-1 Bed Occupancy Alarm With Selectable Detection & Alarm Modes & Lighting Control

The MFT-1 is a new generation bed leaving alarm designed to cope with the demands of today's care industry. The new monitor, mains powered via a power adaptor with battery backup eliminates the requirement of changing batteries and provides the option of selecting bed exit and alarm modes, essential when assessing the requirements of the patient.

- 3 BED EXIT ALARM MODES
- 3 ALARM DELAY SETTINGS
- OUTPUT TO PAGER
- OUTPUT TO NURSE CALL
- OUTPUT TO CARE CALL
- UNDER MATTRESS SENSOR
- ROOM LIGHT ON OPTION
- EASY TO INSTALL
- FALLS MANAGEMENT
- FALLS PREVENTION
- SUPPLIED WITH 1 X PAGER

1. Bed exit lights on - auto off by return to bed with pager alarm. (Live in carer) Instant alarm with a transmission signal to turn on a room lamp. Return to bed by patient will switch lights off automatically after 1 minute. Selectable timer allows choice of 10 minutes, 15 minutes, and 30 minutes delay before activating transmitter to pager alarm, if the patient fails to return to bed. This mode requires the carer to switch the product on at night and off in the morning.

2. Bed exit with delay time before pager/alarm output (Live in carer/offsite carer). A mode switch allows the alarm output to be timed from a choice of 10 minutes, 15 minutes, and 30 minutes delay before a pager signal (or control output) is generated when the patient exits from their bed. Note: This mode does not operate with integral lighting controller.

3. Bed exit with lights on instantly with delayed alarm trigger for telephone auto dialler. (Off-site carer) When the patient exits their bed, lighting control instantly turns on lamp. Bed return delay can be selected for 10 minutes, 15 minutes and 30 minutes. If the patient returns to bed prior to expiry of the alarm delay, lights are turned off automatically after 1 minute. Alarm output is cancelled. If the SU fails to return to bed on expiry of the delay, the alarm output is active and initiation of auto dialling commences, lights stay on until help arrives.

ORDER CODE MFT-1K PRICE £148.00 + VAT (£177.60) COMPLETE KIT AS ILLUSTRATED

**BED ALARM SYSTEM WITH PAGER ALARM ONLY (NO LIGHTING CONTROL FUNCTION)
ORDER CODE MFT-1P PRICE £126.00 + VAT (£151.20)**

MemRabel™

A friendly way to remind people with memory issues.

MemRabel is a product designed to assist people with memory issues. MemRabel can help people who have Dementia by providing daily memory prompts using personally recorded voice memos at specific times of the day.

- RECORD UP TO 4 VOICE MEMOS
- MEDICATION REMINDERS
- TIME TO GO TO BED
- SUN ICON FOR DAYTIME HOURS
- LARGE TIME DISPLAY
- ANTI-TAMPER SET UP BUTTONS
- 4 X DAILY OR WEEKLY REMINDERS
- TIME TO GET UP
- TIME OF DAY ASSOCIATION
- MOON ICON FOR NIGHT TIME HOURS
- DAY OF WEEK AND DATE DISPLAY

MemRabel™

MemRabel can be used with various sensors to help care for people with dementia. A trigger input allows door contacts to trigger warning messages from MemRabel.

Additionally, MemRabel can be connected to a call alarm to warn of potential health problems. See website for full details.

MEM-X The Vocal Reminder That Talks At A Click

The MEM-X is a simplistic looking device that can assist people with memory issues by playing back recorded messages at specific times. MEM-X features a 12 month calendar that can store up to 90, 10 second messages. A capable person sets the time and date of important reminders, keeping appointments, taking medication or any important task that a person needs to be reminded of. An alarm tone, accompanied by flashing of the blue button serves as a prompt for the user to press the button. When the button is pressed the recorded message is played back.

At the rear of the product a locking button protects a compartment where setting buttons are concealed to avoid confusing the user. MEM-X is compact 115mm x 38mm x 17mm, and lightweight 70g including battery (1 x AAA) and lanyard.

ORDER CODE MEM-X
PRICE £92.00 + VAT (£110.40)

PIR Activated Message Player MAMR-02

Fix the memo player to a wall using the supplied fixing bracket. Record a memo for playback (up to 20 seconds), switch the movement sensor on, when a person walks into the detection beam the recorded voice message is played back. Use to remind an elderly person not to let strangers into the home or to check a callers identity, to warn children not to go outside, or as a welcome message in reception to greet guests.

- **POWERED BY 3 X AA BATTERIES**
- **3 MINUTE DELAY BETWEEN VOICE ANNOUNCEMENTS**
- **DETECTION RANGE 2-3 METRES**
- **ON/OFF/RECORD SWITCH**
- **SWIVEL BRACKET FOR OPTIMUM DETECTION ANGLE**

ORDER CODE MAMR-02 PRICE £24.00 + VAT (£28.00)

Movement Triggered Voice Alarm Memo Players

The CTM-PIR is another new product from Easylink UK, designed to provide movement triggered playback of voice memo's. The PIR is connected to the CTM-2 monitor with a short cable (x 2 supplied 1 x 300mm, 1 x 3 Metre). The CTM-2 has a selector switch to choose from sensor pad or PIR. When PIR is selected the monitor responds to signals from the PIR. The PIR has a threeway switch: Delayed, Off, Instant. When delayed is selected the PIR will trigger the monitor one time for complete message playback then locks out any further alarm signals for three minutes. Any movement detected in the three minutes will reset the delay for a further three minutes. This feature alone provides dozens of solutions for anti-wander reminders, spoken warnings and safety messages. The instant alarm provides an output each time movement is detected. All required batteries supplied. Use for bed exit detection, playing reminders when a person approaches an exit door, etc. Optional pager kit CTM2-PAG provides paging alarm.

Doorwatcher™ Wristband Door Egress Alarm

The DoorWatcher system is designed to allow a person prone to wandering more freedom and independence while in care. The system will alert care staff if the resident approaches a monitored door, (internal or external) corridor or hazardous area.

The system comprises of a strip style wristband detector that responds to low level signals continually transmitted by the resident wristband. The door strip monitor includes a built in sound alarm with volume control, a transmitter that will signal the nurse call central monitor and a simple zone detection range setting. Installation is very quick and easy requiring no wiring or professional help. Self adhesive pads secure the door strip monitor to the door frame or adjacent wall.

The resident wristbands are lightweight and comfortable to wear and are powered by sealed in lithium batteries, providing a continuous service life of 12 months. The wristbands have secure power on/off and alarm transmission if unauthorised removal occurs.

Unlimited numbers of wristbands can be used with single or multiple door strip monitors to allow all exit doors to be protected. The advantage of this type of system is the ability to monitor only residents at risk. Our magnetic switch door alarms for example will respond to all residents opening a door. For a single doorway, one Doorwatcher strip is usually adequate. For a double doorway it is recommended that two Doorwatcher strips are used.

Location Devices - GPS Trackers

MT-02 GPS Tracker

- **DIMENSIONS: 80 X 56 X 22MM WEIGHT 50G**
- **GPS ACCURACY 5 METRES**
- **100 HOURS STANDBY OPERATION FROM FULL CHARGE**
- **PROGRAMMABLE FALL SENSOR**
- **AUDIO MONITORING FUNCTION**
- **OVER SPEED ALERT**
- **TALK FUNCTION TWO-WAY SPEECH**
- **MOTION DETECTION**
- **GEO-FENCING**

MT-02 Mini Tracker is an exceptional product providing quick location of the device, whether carried by a person, stored in a vehicle, or concealed in a valuable item.

Mapping co-ordinates are sent when requested by authorised mobile phones. Details of device status and a link to Google maps with hyperlink are sent in a text message. Up to five mobile phones can be authorised to receive data from the device.

The MT-02 features two-way audio with a talk button that will first dial the primary mobile phone authorised to the device. It is also possible to dial the tracker, which can be answered by the user.

The MT-02 incorporates fall sensors with sensitivity adjustment that will detect if a person falls to the ground. An alarm text with mapping details are sent to authorised phones.

There are no monthly or ongoing costs with the MT-02. All that is required is a mobile telephone network SIM card, contract or pay as you go. Note: When using GPRS, data transfer is charged by the network vendor.

The MT-02 is supplied with 2 x 800mA batteries, charger with mini USB connector, separate charger, manual. Requires network SIM card.

ORDER CODE MT-02 PRICE £124.96 + VAT (£149.95)

EM503B Tracker Phone

- **HIGH CAPACITY BATTERY**
7 DAY STANDBY TIME
- **4 HOURS TALK TIME**
- **EXTRA AMPLIFICATION HEADSET**
FOR HARD OF HEARING PEOPLE
- **EASY USE PHONE ADDRESS BOOK**
- **BUILT IN LED TORCH**
- **BUILT IN FM RADIO - SUPPLIED WITH EARPHONES**
- **SOS BUTTON - SINGLE PRESS AUTOMATICALLY**
- **DIALS PRIMARY NUMBER**
- **3 X SINGLE PRESS PHONE MEMORY BUTTONS**
- 6 X FAST DIAL KEYS
- **NO SUBSCRIPTION OR TRACKING FEES**
- **REQUIRES MOBILE SIM CARD**
- **KEYPAD LOCK SWITCH - SUPPLIED WITH**
HIGH CAPACITY BATTERY & CHARGER
- **SUPPLIED WITH STEREO HEADSET**
INCLUDING CLIP MICROPHONE

The EM503B is a practical, easy to use no fuss mobile telephone that can be used on any telephone network. The large keypad and large screen text make the phone ideal for elderly people, people with sight impairment, and those of us who think they can manage without glasses. The built in tracker however, provides some very useful functions.

When GSM tracking is enabled, you can request tracking/location details directly from the phone. You simply send a text to the phone requesting location. The phone will send a text message containing mapping co-ordinates and a mapping hyper-link back to an authorised phone. When using a smart phone or iPhone, you can view the location from a map on your phone. Alternatively, you can use Google maps on a PC or notebook and enter the detailed co-ordinates.

The phone features an SOS button on the back of the phone. When this button is pressed, the primary number receives a location text followed by a voice call from the phone. By accepting the call, the tracker phone hands free function opens to allow two-way conversation.

ORDER CODE EM503B PRICE £114.00 + VAT (£136.80)

Waterproof Pull Cord Emergency Alarm

RON-WC1 Wireless Pull Cord Disabled Bathroom & Toilet Alarm System

The RON-WC1 is designed to provide a visual and audible warning when a disabled person requires assistance when using a toilet or bathroom. The pull cord transmitter sends a radio signal to the emergency call alarm. The call alarm produces an adjustable volume tone alarm with bright flashing strobe LED's to draw attention. The alarm is reset using a wireless reset button (green).

All system parts are battery operated with very long battery life, so no electrical wiring or professional installation is required. The system conforms to all safety and operational standards relating to alarms for the disabled.

The RON-WC1 can be installed and ready for use in under 10 minutes and is guaranteed to perform.

- QUICK AND EASY INSTALL
- TOTAL DDA COMPLIANCE
- NO LICENSE REQUIRED
- NO ELECTRICAL INSTALLATION
- LONG BATTERY LIFE
- ROBUST WATERPROOF CONSTRUCTION
- MULTIPLE W/C MONITORING WITH
- RECEPTION/OFFICE DISPLAY (CMU-02)

The RON-WC1 is supplied as a kit consisting of: 1 x wall mounting emergency receiver (ILB-03) 1 x waterproof pull cord transmitter (WCP-03) and 1 x wireless reset button (WRE-03). Individual product specifications can be viewed in the wireless nurse call section.

ORDER CODE RON-WC1 PRICE £132.00 + VAT (£158.40)

THERMOTXT GSM Temperature Alerts

When people are at risk from extremes of temperature, particularly the elderly or infirm, Thermotxt provides piece of mind for families and crucial warnings to off-site carers. People in isolated areas, people on low incomes, the elderly possibly suffering from dementia are most at risk. Thermotxt uses the mobile network to send emergency text messages when room temperature falls or rises beyond selected levels. This early warning can help save lives.

- SET LOW/HIGH TEMPERATURE BY SENDING TEXT MESSAGE FROM AN AUTHORIZED MOBILE PHONE
- THERMOTXT PLUGS INTO MAINS SOCKET WITH BATTERY BACKUP TO SEND ONE TEXT IN THE EVENT OF A POWER FAILURE
- THERMOTXT IS EQUIPPED WITH A MAINS POWER SOCKET THAT CAN BE REMOTE CONTROLLED BY TEXT MESSAGE - TURN ON A HEATER OR LIGHT TO WARN A HARD OF HEARING/DEAF PERSON
- REQUIRES MOBILE SIM CARD (ANY NETWORK)

GSM Dialler Low Temp Warning

This system uses a conventional heating thermostat connected to a GSM dialler. The dialler can store up to 12 emergency contact numbers and can record two outgoing emergency messages (like an answer machine), it can also send text messages to authorised mobile phones. You simply set the wall mounted (familiar looking) thermostat to the required alarm temp, high or low. If the temperature rises or falls beyond your selection, dialling commences to all stored numbers sequentially. Battery backup 24hours. Listen in one-way intercom function.

TEMP SENSOR IS WIRED TO GSM DIALLER (ANY LENGTH OF CABLE) THERE ARE TWO SETTINGS: WINTER - SUMMER.

ORDER CODE KAD06-TA PRICE £157.50 + VAT (£189.00)

AC Mains Power Fail Alarm Devices

With the internet playing such an important part in peoples lives these days there is nothing more annoying than having to reboot the router to solve connection problems. For a disabled person who may rely on the internet for connection to the outside world and to help manage their daily lives a system crash can be a serious problem. Products that use the internet to relay patient data of living habits cease to work without an internet connection. A simple solution is available, Powertxt. Powertxt sends text message alerts to an authorized mobile phone if power fails on a ring main circuit. Powertxt simply plugs into an available mains socket. Appliances are plugged into Powertxt. You simply send a text to Powertxt to switch off the power to the router then send a text to switch it back on, rebooting the system from anywhere in the world.

- **POWERTXT SENDS A TEXT ALERT WHEN AC POWER FAILS**
- **POWERTXT WILL ALERT ONE NUMBER OF POWER FAILURE**
- **PROTECT VULNERABLE PEOPLE AT HOME**
- **LOW COST - LOW MAINTENANCE**
- **ONLY THE COST OF A STANDARD NETWORK MESSAGE FOR ALERTS**
- **POWERTXT CAN ALSO TURN APPLIANCES ON/OFF BY SENDING A TEXT**
- **UNLOCKED TO ANY CELLULAR NETWORK - REQUIRES SIM CARD**

ORDER CODE POWERTXT PRICE £112.50 + VAT (£134.99)

Can be used to activate or deactivate care alarms when not in use during the day.

ORDER CODE YB200 PRICE £19.92 + VAT (£23.90)

Products To Aid People With Sensory Loss - Dual Sensory Loss

Easylink are able to offer a small range of simplistic products to aid the daily living for people with dual sensory loss. Using the products below a useful range of alerting solutions can be achieved.

- DOOR BELL ALERT
- OFF-SITE HELP REQUEST
- WATER OVERFLOW ALERT
- ATTENTION SIGNAL
- SMOKE ALARM
- CUSTOMIZATIONS
- HELP CALL BUTTON
- ROOM TEMP ALARM

The **MPPL** 3-channel pager indicates channels by producing a distinctive different vibration pattern for each channel.

1. Constant.
2. Intermittent.
3. Transmitter low battery fast pulse.

Page 22.

FAS-2 is a multifunction transmitter with SOS button, fall alarm detection, alarm cancel, and two additional control buttons that can be programmed for other applications by request. Each time a button is pressed, the fob style transmitter vibrates to confirm operation to the user. Page 8.

MPPL-TXU is a universal transmitter that has all the inputs required to connect to most devices to provide a wireless alert to the pager. Channels 1 or 2 are selected by jumper, 3 is reserved for low battery warning. Any switching device can be connected to the input. Page 22.

FC-CHD is a transmitter fitted with a special transmitter that sends alarm signals to the MPPL alarm pager, including low battery alert. A bedside alarm is also available with pillow shaker (FC-CHS). Page 38.

HIGH VISIBILITY COMPUTER KEYBOARD

For people with visual impairment this fully featured keyboard provides high contrast clearly labelled keys. Compatible with any computer or laptop with connection via USB.

ORDER CODE KBS-YEL PRICE £20.83 + VAT (£25.00)

Sound Detecting Transmitter With Pager & alarm Receiver - Baby Monitor For Deaf People

The AC30 is a sound detecting transmitter that sends an alarm signal to either the AC50 or the AC20 alarm receivers. The AC30 can be battery or mains adaptor powered, has a sensitivity control and a delay control. The sensitivity control can be adjusted so that very quiet sounds will cause an alarm, or louder sounds are required to cause an alarm. The delay control goes from instant sound detection to alarm, to sounds lasting up to 30 seconds before the alarm is sent.

The AC 50 is a portable lightweight pager powered by 3 x AAA batteries. The pager has a vibration alert or tone beeper (selectable by switch) and a tone beeper volume switch. The pager can indicate by flashing LED, up to four different transmitters (as detailed on this pager) enabling multi-patient or multi-product monitoring. Example: Baby monitor, door bell, personal help call pendant, wander detecting device.

The AC20 is a desktop alarm with camera flash type visual alarm, high output audible alarm with volume settings, and can be use to raise a visual alert to incoming telephone calls, in addition to producing an alarm when signalled by the transmitters details on this page, ideal for hard of hearing people. The AC20 can be powered by 4 x AA batteries or mains power adaptor. The AC20 has three separate alarm channels, each with an alarm active LED. Additionally, the AC20 has an output to connect a pillow shaker to alert deaf people.

The AC20 and AC50 provide quality alarm receivers for home care alerts to carers.

Wireless Alarm Reset Button

Required to reset WCP-03 pull cord transmitter. 85mm x 85mm x 10mm. Powered by sealed in Lithium battery with a service life of five years. Reassurance LED lights to confirm operation to user. RF power 10mW max, range 100M.

ORDER CODE WRE-03 £46.00 + VAT

Wristband Call Alert

Resident wristband call button. Sends call signal to CS-01, CMU-02 and ILB-03 alarm. 5 Year battery (Lithium).

ORDER CODE TXP-01 PRICE £46.00 + VAT

Professional Wireless Nurse Call System

Central Monitor Nurse Call Display

The Central Monitor will receive and display signals from all patient call devices; washroom pull cord transmitters, bed head call point transmitters, bed and chair occupancy sensors, wristband transmitters and DoorWatcher anti-wander systems. When activated by a patient call, the CMU-02 produces an audible tone alarm with volume adjustment. The display will indicate the type of transmitter, toilet, bed head etc, with backlit display. The monitor also displays with audible alarm the condition of the system, radio interference problems, low battery warnings for all devices, missing or broken items. Any number of CMU-02's can be used in a system. One per floor or area is recommended.

The CMU-02 is powered by 12V DC power adaptor with battery backup provided by 4 x D cell batteries. Dimensions: H 205 mm x W 145mm x D 42mm.

ORDER CODE CMU-02 PRICE £180.00 + VAT

Signal Repeater For All Wireless Nurse Call Transmitters WSR-02

The WSR-02, receives signals from all nurse call component transmitters. The signal is then retransmitted with increased power to enable signals to be relayed to the Central Monitor CMU-02. Generally, the bed-head call point transmitters provide good range. The WCP-02 and WRE-02 wireless pull cord sets are lower power and will require signal amplification. The WSR-02's can be set up in a chain to allow greater distances to be achieved or to facilitate signal penetration in buildings with old thick walls or known signal problems. Dimensions: 210mm x 145mm x 45mm. Powered by 12 Volt DC or 4 x D cell batteries (24 month battery life).

ORDER CODE WSR-02 PRICE £84.00 + VAT

As part of our service, systems can be set up in our factory with your required location and room numbers. Each item is clearly labelled, making installation really quick and easy. All call points are battery operated with the option of using mains power adaptors.

ILB-03 Signal Repeater With Visual & Audible Alarm

The ILB-03 is a combined wall mounting audible-visual alarm with built in signal repeater. This dual function device re-transmits all data from transmitters learned into the device (up to 15 transmitters) at higher signal levels to the CMU-02. The WRE-03 and WCP-03 bathroom transmitters may require a signal repeater as they are lower power than the call point transmitters. Where a repeater panel is required in another area of the building the ILB-03 can be used as a general alarm for a group of rooms or patients, saving the requirement of a nurse call display for that area. Powered by 4 x D cell batteries.

Signal repeater unit with built in audible alarm with volume control and flashing strobe LED's. Boosts signals by approximately 50 Metres. Battery operated (24 months) 4 x D cell. Memory stores 15 transmitter devices.

ORDER CODE ILB-03 PRICE £78.00 + VAT

The Rondish wireless nurse call system provides excellent reliable service, requires no specialist programming or electricians to install. The system can cope with the demands of any busy care home or hospital and can also integrate with falls management programs. Bed and chair occupancy sensors, enuresis alarms can quickly integrate with a system to provide complete care solutions.

The DoorWatcher™ door egress monitor can also be used to expand wander detection, also indicated and alarmed by the CMU-02. Additionally, doors can be alarmed using the BTX-DC with standard door contacts.

Pendant Help Call Telephone Auto Diallers

POWERTEL PT50 Emergency Pendant Dialler Telephone

The PT50 is a comprehensive care phone. A waterproof pendant is supplied to initiate dialling of stored emergency contact telephone numbers. The PT50 is compatible with any telephone company land line and there is no ongoing costs other than the usual cost of a call when the dialler makes an emergency call.

PT50 features amplified handset to aid hard of hearing, incoming visual call alert, big buttons, 3 x direct dial one-touch memory buttons, two-way intercom for making and receiving calls. Talking keypad and talking phone book.

<http://www.easylinkuk.co.uk/page55.html>

DORO CARESECURE 350

The CareSecure 350 is a simple to use care package housed in an attractive, uncomplicated telephone. Designed with elderly people in mind, the 350 features amplified incoming caller volume for both handset and two-way intercom. There are seven one-touch dial buttons that allow a small photo or name label to be inserted to aid people with dementia or cognitive issues.

Two portable help call pendants are supplied with the phone to activate automated dialling to up to 6 stored emergency contact numbers and to answer a call using the intercom function. A generous 30 second message record function allows a detailed outgoing emergency message to be recorded, heard by emergency call recipients. The phone also has visual incoming call indication to aid people with hearing loss. Phonebook navigation is very straightforward with simple menu functions. To aid visually impaired people all key pad presses and phonebook functions are spoken.

ORDER CODE CS350 PRICE £108.34 + VAT (£130.00)

CAREPHONE™ A Pendant Call Alarm That Provides Two-Way Communication From The Pendant

WHAT IS CAREPHONE?

CarePhone was developed primarily as an emergency contact aid for the elderly. CarePhone has a unique feature that enables two-way conversation from the help call pendant to the emergency call recipient at the other end of the phone.

Many devices incorporate a two-way intercom, which is useless if the user is not close enough to the intercom device when they need to talk, or some one needs to check up on them.

CarePhone offers multi-functions to benefit the user. CarePhone has a medication reminder function that allows various alarm times to be set during the day. At alarm time, the built in speaker on the pendant verbally reminds the user it is time to take their medication.

CarePhone offers piece of mind to concerned family members, and a communication link to distant relatives or carer's. The CarePhone is very easy to set up an install requiring only an active telephone land-line. The pendant is easily maintained and presents no complication with charging or identifying a low battery alert.

CarePhone will operate on any active telephone land line with the only cost being that of a telephone call to an SOS number.

A monitoring service is available for a Monthly charge of £12.50 for people who do not have family, neighbours or carer's to act as SOS contacts in case of emergency. Details available upon request.

- **SOS PANIC BUTTON ON PENDANT AND BASE STATION**
- **END USER CAN PRESET 3 NUMBERS**
- **SPEAKERPHONE IS ACTIVATED AUTOMATICALLY**
- **2 CONFIGURABLE SOS CALLING MODES**
- **GIVES SOS CALL PRIORITY OVER OTHER INCOMING CALLS**
- **LOW BATTERY LEVEL ALERT AND OUT OF RANGE ALERT**
- **PENDANT IS WATERPROOF TO IP57 CERTIFICATION**
- **ANSWER INCOMING CALL FROM PENDANT**
- **DAILY TIME ALARM FUNCTION**

Communication Made Simple - Assistive Phones

SimplaPhone Touch Screen Photo Dial Telephone

The SimplaPhone is equipped with plenty of easy to use features to make using the phone a breeze for the elderly, people with dementia, people with cognitive problems, and for people with learning difficulties. The SimplaPhone walk about handset with built in camera allows a carer (or user) to take a snapshot of a person they would like to add to the telephone memory dials. Uploading of the photo is done automatically to base station memory when the walk-about handset is placed on the charger base station. You simply add a name and number to the photo then you're ready to touch and talk. Additionally, photo's can be uploaded from a USB flash drive making it real easy to include distant friends or family. It's so easy, it's a SimplaPhone to use.

FAS-2 FALL SENSOR & SOS BUTTON (P8)

Up to 4 separate alarm products can be used simultaneously with channel indication provided by flashing LED. When an alarm signal is received, the internal sounder operates, the appropriate channel LED flashes and the alarm output relay is energized. For deaf people, a vibrating pillow shaker can be plugged into an output socket located on the rear of the housing. The NMD-04 reports potential faults via the fault LED combined with flashing channel LED. Fault reporting includes: Radio interference, alarm device failure, AC power loss.
