The products featured in this section of our catalogue are predominantly to aid care of people living with Alzheimer's disease.

- MEMORY PROMPTING DAILY REMINDER CLOCKS
- WANDER DETECTION
- EASY USE TV REMOTE CONTROLS
- MISPLACED ITEM FINDERS
- EASY-TO-USE PICTURE DIAL TELEPHONES

Memory loss that disrupts daily life - forgetting recently learned information, important dates, events, important daily health routines, medications.

Confusion with time & day of the week - Unfamiliar or difficult to view time displays, confusing symbols, time of day association

Wandering away from the safety of home - Six in 10 people with dementia will wander. A person with Alzheimer's may not remember his or her name or address, and can become disoriented and distressed

Personal Data Privacy Statement

© 2018 Medpage Limited T/A Easylink UK. The material contained in this publication may not be copied or reproduced in any way without prior consent. The products detailed in this publication are only available through Medpage Limited and their authorised distributors.

Medpage Limited T/A Easylink UK is a family owned and ran business established in 1984. We have a long history of innovation and creative care solution providing for the healthcare industry. The majority of the products we supply were invented and designed by our company and are controlled by our company, which we consider of vital importance when providing guarantees of quality and competent product technical support. We have a long standing passion and pride in our business, reflected in the service we provide.

Medpage is BSI accredited to ISO 13848:2003 and ISO 9001, certification we have maintained for the past 14 years, when we commenced manufacture of medical devices. Our close associations with Occupational Therapy teams across the Country provide us with vital case level feedback that aids design of technologies that are required to improve patient care, or increase an individual's ability to live independently in the community. Our philosophy remains focused on producing and supplying affordable quality technologies, backed up with first class service and product support.

VAT Exemption. The majority of products we supply qualify for relief from VAT. You can claim exemption from VAT by requesting a VAT exemption form from our sales team, or downloading it from our website.

Orders. We accept orders from the public, trade (subject to account vetting), Local Authorities and NHS with a valid purchase order.

It has been a pleasure, and hopefully one that will continue for some time, to be able to help so many people over the years live better lives through our effective technologies.

Mike Dines
Managing Director

When people suffer from cognition and failing memory issues, life usually becomes more stressful for the individual, their family and or carers. Medpage have developed and sourced a range of products that relieve some of the everyday frustrations people experience. Forgetting to take medications, keeping appointments, forgetting to eat, drink, even collecting the children from school. In this section of our brochure you will see simple

but very effective solutions for creating memory prompts, which can provide reassurance and improve self-esteem for a person living independently. It is very worrying when you have ageing parents and live some distance away from them. From personal experience, I know this can be difficult and painful at times.

What are your main worries/concerns?

- **Home security** – are they leaving entrance doors open, going out at unusual times? See the Wi-Fi Door sensor, extremely useful for logging details on your Smartphone of door opening and closing times.
- **Falls** – always a big worry and not always easy to detect and raise an alert to? See the home occupancy detection alarm.
- **Loneliness** – probably one of the major concerns. Can they hear a conventional telephone or is their hearing loss prohibitive? See amplified telephones and consider using Skype or Facetime with a tablet or Smartphone, if they are tech savvy.
- **Eating/drinking** – many elderly people suffer delirium through malnutrition or dehydration. See the MemRabel 2 and YourMinder memory prompts.
- **Home safety** – Room/house temperature. Cookers turned off. Adequate lighting, especially when making a W/C visit during the night. Overflowing sinks/baths. Smoke/ fire risk. See the GSM home occupancy alarm with sensor options.
- **Medication management** – See MemRabel and YourMinder.

Throughout this brochure you will also see information for live-in carers with help on Wander Detection, Falls Prevention and basic aids to help with daily living.

Mike Dines
Managing Director

MEMORY PROMPTING AND COGNITIVE AIDS

MemRabel 2

HOME SECURITY WI-FI DOOR ALARM - WANDER DETECTION

The Medpage Wi-Fi door sensor provides an effective solution for wander detection and home security. A log is created on your Smartphone when doors are opened and closed. The sensor connects to a home or business broadband router and is set up and controlled by a Smartphone APP for iOS and Android. The sensor can be fitted to entrance doors, internal doors, cupboard and fridge doors, useful to monitor eating habits etc.

Wi-Fi DOOR/WINDOW SENSOR

- Built-in WIFI module that sends all alerts to your Smartphone
- Super low power consumption, typically only 2 x AAA batteries/year
- Turn On/Off sensors remotely from your mobile
- Separate low battery and loss of signal notifications
- Life-time cloud service provided free of charge
- Powerful APP for your Smartphone provided free of charge (iOS & Android)
- User can create floor plans in the APP showing device location in the home or building
- APP records last 30 activations time and date stamped
- Know the time and date when a door is opened and when it is closed
- Multiple sensors can be used in the same household
- No running costs or monthly subscriptions all that is required is home or business Broadband
- Set the time when the sensor is active via the APP
- DIMS: H 55mm W 35mm D 22mm (Controller)

ORDER CODE WF06
PRICE £49.95 + VAT (£59.95)

The WF06 Wi-Fi Door & Window sensor is controlled entirely from the free APP. Multiple sensors can be added, for use in a care home for example, and can be marked on a floor plan within the APP. When a sensor is triggered an alert is received on your Smartphone, giving precise details of alert time and date and location of the sensor within the building.

More Wi-Fi sensors are featured on page 33

WI-FI CONNECTED BED & CHAIR OCCUPANCY ALARMS

A new generation of bed and chair occupancy alarms developed by Medpage, which relay information to a Smartphone through the internet. A Smartphone App (Android & iOS) provides a log of events, recorded with time and date. Sit down, get up from chair. Get into bed, out of bed. Extremely useful for assessing daily living habits.

Multiple phones can connect securely to a free online account, enabling all family members or carers to view the information.

- Quickly learn a persons living habits - bedtime, times out of bed and when, time sitting in chair
- Simple secure pairing with home or business broadband router
- Up to 200 WI-FI alarm devices can be monitored by single or multiple app users
- Name sensors within app - bed alarm - chair alarm - or room and bed details if used in a care home
- Take photo of alarm device to display in app
- Set active monitoring times for sensors via app (10pm – 7am for bed)
- Select alarm type for smartphone – chime, claxon or log file only
- Receive time/date alert details recorded with review option in app
- Incorporate with other WI-FI sensors including; door alarm, movement sensor, temperature sensor, water/flood detector (see p33)
- Powered by 2 x AAA batteries typical 4-6 month use before replacement (notified via app)

SENIOR CARE DAILY ACTIVITY MONITORING GSM ALARM

- DAILY ACTIVITY MONITORING
- LACK OF DETECTED MOVEMENTS AROUND THE HOME
- RAISES AN ALARM (TIME PROGRAMMABLE)
- HOME TEMPERATURE MONITORING WITH PROGRAMMABLE HI/LOW ALARM
- HOUSE POWER FAILURE ALERTS
- SECURITY MODE OPTION (AWAY FROM HOME)
- ANDROID AND iOS SMARTPHONE APP

The ECS-K1 is a care system that uses wireless sensors to monitor a persons daily activities. Within programmable times, you can, for example, receive an alert via text message or phone call if a person has not left their bedroom, entered the kitchen or living room, or opened their fridge door within a set time period. For vulnerable people living at home alone with anxious families worrying about their well-being, this system offers an affordable, non-intrusive means of monitoring their daily activities, and provides emergency help call support. Alarms are sent via text message to carer mobile phone. Dialler phone calls can be received by mobile or land line telephones.

ECS-1 CONTROL HUB FEATURES/SPECIFICATIONS

- Powered by 9v DC power adaptor
- Sos help button (on hub)
- Portable waterproof call pendant (range 30-60m)
- 8-10 Hour battery backup
- Quad-band (850/900/1800/1900mhz)
- Dims: 120mm x 120mm x 35mm
- Gross weight 420g
- Requires standard mobile network sim card
- Suitable for use on any UK mobile network

SYSTEM INCLUDES

- 2 x PIR movement sensors with batteries (9v)
- 1 x gsm communication hub with A/C power adaptor
- 1 x waterproof call pendant with glow in the dark button
