

The Invalow

The Premier Low-Rise Platform Lift

Vertical travel up to 1 metre. Internal or external use. Easy to use.

Low Rise Platform Lift

The Invalow is a new concept in lifting platforms, constructed from anticorrosive anodised aluminium extrusions. Its stylish appearance blends in with the most prestigious surroundings and is suitable for both internal and external applications.

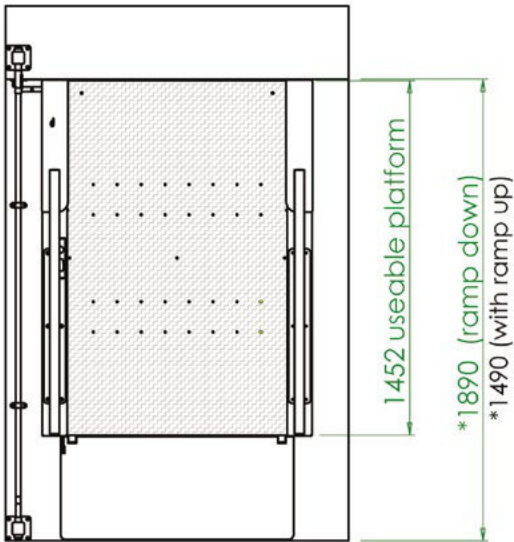

Rising up to one metre step height, the Invalow is designed to give total independence. A call station is installed at both upper and lower levels and 'easy to use' controls are fitted on the platform.

In order to meet individual applications and requirements, options available include laminated glass infill panels to lift and safety gates, powered gate, and key control system.

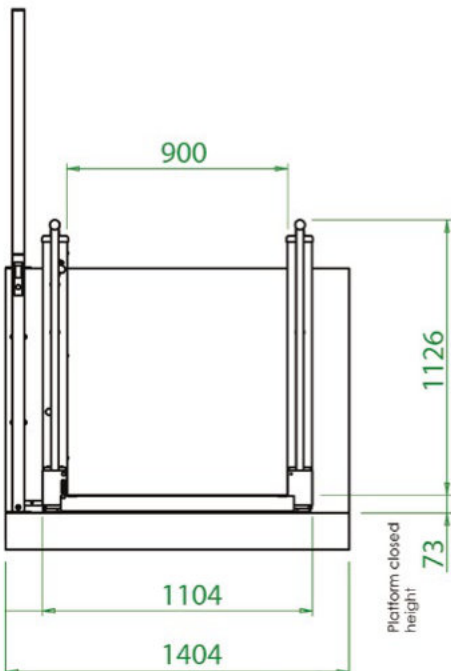

The Invalow is exceptionally robust, lifting a full 300kg, and is therefore suitable for virtually all wheelchairs.

Dimensions

Plan view

Elevation

Features:

- Capacity – 300kgs
- Platform size – 1450mm x 900mm
