

The Bureau are Partners of ECSC Group plc who run regular Webinars and Cyber Security Workshops throughout the year for firms wanting to improve their data and cyber security systems. They hold events at various locations to help SMEs and other organisations keep improving their data and cyber security.

Working from home has caused plenty of security issues over the past 17 or so months. Learning how to keep employees safe from phishing and malware scams at home and in the office has become the new challenge for which ECSC has many useful tricks and tools.

If you are concerned about data and cyber security these workshops will help you to create your own data and cyber security strategy. These are non-technical workshops for SME owners and directors, so no daft techno babble.

ECSC workshops are tailored to the participants on the day. They conduct a pre-event scoping sessions for each organisation attending to ensure the content is relevant.

Forthcoming Workshop Events:

The SIEM Design Workshop 28 September 2021 09:45-15:15
