Revolutionising - your Care Home Cleaning with both Cost and Time Savings.

Andway are proud to introduce Actichem, a simple, no-nonsense range of cleaning products designed to minimise your stocking, streamline your range for more effective cleaning, make staff training as simple as possible and save you £1000s per annum.

TESTIMONIALS - WHAT OUR CUSTOMERS ARE SAYING...

We purchased your Actichem products and would just like to say how good these products are.

They are long lasting so are cost effective, they have a nice smell and clean well. We find them easy to use with them being colour coordinated.

We are very pleased with these products and will continue to order...

Oakworth Manor

Very positive feedback and the sticky floors are now a "thing of the past".

Canal Vue have not had any episodes of running out of cleaning products which is a great improvement...

THE BENEFITS OF THE ACTICHEM SYSTEM

SIMPLIFIES STAFF TRAINING

The training of cleaning staff is made so much easier with the Actichem range. Users can be taught to select the correct product for a particular task simply by looking at the product colour: Blue for interior cleaning, green for floor, red for sanitary areas and yellow for sanitising surfaces. This colour coding system is already well established in most European countries, and will therefore aid any non-English speakers with product selection.

IMPROVES STANDARDS OF CLEANING

The colour-coding and label design used in the Actichem range helps to ensure that the products are used for their correct application, thus achieving optimum results. The colour-coding can also be extended to the equipment used to apply the products in each different area, therefore minimising the risk of cross-contamination.

MULTI-LINGUAL TRAINING RESOURCES AVAILABLE

Multi-lingual pictogram guides available on request in most European languages to further aid training.

STANDARD DILUTION RATES

All Actichem products have a standard dilution rate for ease of use, 1 pelican pump per trigger, 4 pelican pumps per bucket.

SURFACE SAFE PRODUCTS

All Actichem products are extensively tested in real world environments meaning they are safe and suitable for use on your surfaces.

HOW ACTICHEM WILL SAVE YOU MONEY

- Drastically reduces the number of cleaning products that are required in the Care Home to 6 - these products cover all areas of general cleaning including floors, surfaces, washrooms, kitchens and general areas. This can be further reduced to 3 or 4 products in some environments.
- Actichem **simplifies stocking** and reordering
- **Highly effective products** - excellent cleaning results - try before you buy
- **Standard dilution rates** - reduces the risk of wastage

UNDERSTANDING THE ACTICHEM LABELS

Colour of the label indicates which areas of the home it can be used in

Simple Dilution Pictograms indicate how to dilute into trigger sprays and 5L buckets.

List of the surfaces where this product can be used.

Detailed dilutions and application instructions.

Detailed health and safety information is listed towards the bottom of each label.

Dilution made easy...

All the dilutable products in the Actichem range have the same dilution rate to simplify usage

600ml Trigger spray:
 = **1** x  **30ml**

5 Litre Bucket:
 = **4** x  **120ml**
