

Immersible Temperature Logger

Track the temperature of food and drink during the manufacturing process and ensure your washing equipment achieves thermal disinfection. Waterproof loggers with a wide range of applications including pasteurisation, food processing, dishwashers and washer disinfectors.

Waterproof, with a temperature rating of 102°C, this logger is easy-to-use and robust. The unit has a high visibility yellow case and an external probe which gives it a fast response time. The unit can be returned for battery replacement, calibration and repair. Data is downloaded to the computer via a USB or serial download pad. This 'wireless connection' eliminates the need for sockets with waterproof caps which can easily be lost or forgotten.

FEATURES

- Submersible temperature recorder
- Waterproof to 15m
- 32,000 reading capacity
- User-programmable logging interval
- 2 user-programmable alarms
- Delayed and trigger-start options
- 3 stop options
- Low battery warning

98-0200-01

Waterproof, fast response & high temperature loggers

Wall Mount Thermometer Kit

Three of our most popular products combined in a cost effective kit. The storage solution for any busy catering environment.

The kit includes one of our waterproof and robust MM2000 handheld thermometers, a dishwasher-safe TP05 needle probe plus a wall mountable stainless steel holder.

£125.00

Sous Vide Temperature Monitoring Kit

Sous Vide is becoming an increasingly popular cooking method, which seals food within a vacuum pack before placing it in a hot water bath. The food is then cooked at a set temperature, over a controlled period of time, to better retain nutritional content, moisture, flavour and tenderness.

This cooking method requires careful monitoring and precise measurement of the temperature, due to most of the food being cooked at a comparatively low temperature.

Be safe and sure that your food is cooked properly with this cost effective, quality thermometer kit.

(Kit includes- waterproof MM2000 thermometer, dishwasher-safe fine needle probe for testing the internal temperature of your food and water bath temperature, instructional booklet and temperature logging booklet, self-sealing foam tape and convenient carry case)
