

HOSPITALITY

ISSUE #1

from  **HARFIELD**
QUALITY TABLEWARE SINCE 1961

Welcome

to the first edition of our Hospitality brochure

Harfield are a long-established manufacturer of high quality, virtually unbreakable tableware and now a founder member of the EPIQ group of European Producers of Innovative, Quality tableware. Our core markets have traditionally been education and healthcare but now thanks to our history of innovation and market leading quality, we are able to offer our latest products to a much wider market. We now have a range that will suit most dining establishments.

What does this mean for you?

Firstly, and most importantly, you can be reassured that you are dealing with a company that has your interests at heart. We manufacture products that meet your needs.

Secondly, we guarantee quality and provenance. All our products are made in the EU, meaning there are no questions about ethical sourcing or indeed environmental factors from sourcing from the Far East.

Thirdly, our products are designed to save you money and enhance your service. Take the S-Plank – this is an item that can be used for display or for serving hot or cold food on. It has the look and feel of slate or wood, but it is dishwasher safe and comes with a 5-year anti-breakage warranty. Better presentation, better hygiene, lower costs ... it is a stunning product.

Fourthly, our products are available from nearly all distributors, so you can purchase them from your usual supplier.

This is just a small selection of the products we offer. From solutions for display, high quality virtually unbreakable barware and oven to tableware through to plates, bowls and cutlery, there is something for you! Most of the products you will see in this brochure are available in more colours. Trays, S-Planks and barware can also be personalised with your logo, branding or message.

We hope that this brochure inspires you. For more information or to request our latest full catalogue, please email carolmoodie@harfieldtableware.co.uk

All our products are made from polycarbonate unless otherwise stated.
