Incorporating our  
Oak Range

# welcome

## Your choice

Welcome to our latest brochure showing Glyngary's extensive range of top quality external joinery products using quality timbers including oak, sapele, iroko and redwood.

After listening to our customers, we understand that sourcing quality timber products can be problematic. Choosing the best company for the job isn't easy with many unable to deliver on the sales promises they make. Slow response times, unreliability and poor product quality are experienced all too often whilst quality, service and value for money can rarely be relied upon from one firm alone.

Glyngary is different. A family owned firm since 1985, we pride ourselves on our ability to consistently deliver the quality, service and value customers are looking for, each and every time. All products are manufactured in our own well equipped and modern facilities by our fully trained craftsmen workforce who appreciate that the level of workmanship put in reflects on both their own and Glyngary's reputation. Our passion for customer

service is reflected throughout every level of our organisation.

Although small in comparison to others, our fully integrated sales office ensures that every customer enquiry is dealt with effectively. Whether it's a quote, delivery lead time, product advice, bespoke or general enquiry, you can be assured that every call will be dealt with efficiently. At Glyngary we never forget the vital role customers play in the success of our business and yours.

We welcome visitors to take a tour of our facilities and showroom. For those who cannot visit we offer a CD-ROM 'Factory Tour', please telephone for a copy.

We hope that you enjoy looking through our brochure and find the products you are looking for. Alternatively we provide a bespoke service where the possibilities are endless in terms of style and design, please contact us for more details.

Glyngary's Energy Efficient windows consist of highly insulated double glazed units allowing the maximum amount of solar energy to pass through the glass into the room providing free solar heat gain. The advanced glass coating then reflects the heat back into the room rather than letting it escape.

Glyngary has achieved 15 WER ratings so far, and we are continuing to certify products. All 15 products are either 'A' or 'B' rated, which is most impressive, when a 'C' is considered as compliant.
