Company Profile

MESM was founded to fill a gap in the Clinical Trials Medical Equipment market, by providing equipment with the 'highest level of service and support for our customers'. We offer a one stop solution for medical equipment whereby we will source, supply, service and carry out full life management of all of our customer's equipment.

Based in Lancashire, UK our main operations are conducted from Chorley, where sales & marketing, purchase, service and warehouse operations reside.

Core Values

We value all of our customers and suppliers. Our commitment is to build strong working relationships in order to deliver equipment and services tailored to our customer's needs

We strive to provide our customers with the highest standards of service and support.

Services

We will source any equipment required for a clinical study to budget whether it be one item or the full procurement requirements for a Clinical Research Organisation. We continuously search the market to ensure we offer both an extensive and appropriate range of products and services bespoke to our customer's unique needs.

MESM is dedicated to providing full 'Lifecycle Management' of medical equipment including:

- Sourcing Products
- Hire, purchase & storage options available
- Global On-Site Service and Calibration
- Offering the Lowest Total Cost Solution for your study
- 24 Hour Technical support
- Full Life Equipment Management
- Collection and End of Life Recycling
- Equipment Training & installation
- Strategic Equipment Planning
- Global Logistic Management

Strategy

To supply, maintain and manage through full equipment life cycle all of our customers clinical study requirements. To support this we intend to have local support to global studies. To be the outsource partner choice.
