Fully installed specialist Indoor Cricket Netting and Trackway systems

# Specialist Indoor Netting Systems

*A key service provided by Huck Nets is the manufacture, supply and installation of indoor sports hall and cricket ground net facilities.*

- Full supply and installation service
- Experienced installation technicians
- Free site surveys and quotations
- New design and facility lay-out advice
- Servicing department offers service check visits
- New projects or replacement equipment
- Renovation service for existing installations
- All materials to BS Standards
- Lighting [lux ratings] advice available

Whether it is a new installation or refurbishment of an existing netting system we can provide you with everything you need for the project. Our specialist installation technicians will survey, design, cost and manage the complete project for you. With over 30 years of successful installations behind us you can be assured that your project will be in safe hands...

Whilst our speciality is cricket, we also provide facilities and equipment for basketball, netball, indoor hockey and football amongst others, enabling multi-sports projects to be completed under one contract. By handling projects of all types and sizes we have gained a high level of practical knowledge and skills.

**We have installations UK & Worldwide. Our many satisfied clients are a testament to our reputation...**

#### **A few recent installations in the UK:**

- @Futsal Centres, Swindon & Birmingham
- The John Warner School, Hertfordshire
- Whitgift School, Surrey
- Dollar Academy, Clackmannanshire, Scotland
- Thomas Alleyne's High School, Staffordshire
- Loretto School, Scotland
- City of London School
- Somerset County Cricket Club
- Cornwall College
- Ilfracombe College, Devon
- Army Control Board, Aldershot

#### **And Overseas!**

- The Fitness Centre - St Lucia, Caribbean
- I.C.C. Gibraltar Cricket Association
- I.C.C. Jersey Cricket Association

## Every installation is different

*That is why every installation is tailored to meet your specific requirements.*

A guideline price can be given from your estimates and dimensions but a site inspection, which is offered free of charge, is key to doing the job properly and to costing it correctly. We will look objectively at your installation plans and provide unbiased advice regarding siting, suitability and dimensions, matting, flooring and lighting if required. With special measuring instruments we will determine precise dimensions from which drawings can be produced. Particular care is taken with regard to the variance of floor levels to ensure materials are cut, trimmed and finished to perfection. Site photographs are also used as key references during the preparation of installation plans.

## Products & Solutions available

- Knotless indoor netting with a choice of colours
- Wide range of single, double and multi-bay systems

## Testimonial from @Futsal

@Futsal Limited are in the process of rolling-out a number of arenas across the UK to enable people to play Futsal in a modern environment that will provide an innovative lifestyle and playing experience. The arenas incorporate a number of modern and high-tech features to enable a unique experience. Working closely with the national Football Association and regional Football Associations, the arenas provide local and national leagues for adult and junior players, both male and female.

To date, @Futsal Ltd has opened four @Futsal 5-aside indoor football arenas – Birmingham, Cardiff, Leeds and Swindon. Leeds is the most recently opened and consists - 8 standard @Futsal pitches, 2 FIFA international @Futsal pitches and 4 FIFA regulation championship Pitches. More arenas are planned for 2013.

### What is Futsal?

Futsal is the only officially recognised form of indoor football accepted by FIFA, the world governing body for football. It is reported to be the world's fastest growing indoor sport with over 30 million players worldwide. Players such as Messi, Ronaldo, Ronaldinho and many others have developed their abilities playing Futsal from a young age. The Football Association has recently adopted Futsal and it is now seen as a cornerstone of The FA's strategic development plans.

Futsal is played between two teams of five players, one of who is a goalkeeper. In addition each team may have up to 7 substitutes, which means each team can comprise a maximum of 12 players. Unlike some other forms of indoor football, the playing arena boundaries are marked with lines, and not walls or boards that players can use to rebound the ball. Futsal is played with a smaller regulation ball with 30% less bounce than normal. The ball can also be kicked above head height, so goals are similar in size to hockey goals. Corners can be taken and throw-ins are replaced by kick-ins from touch lines, both of which must be taken within 4 seconds. This makes the game very fast, dynamic and exciting. As a small-sided game, players are constantly placed in situations where they must receive or play whilst under pressure or in confined spaces and it places considerable demand on technique, movement, tactical awareness and fitness. It is also very exciting and a huge amount of fun!

**Huck Nets manufacture, supply and install the specialist indoor netting for @Futsal, this includes not only the provision of floor to ceiling netting but also the tracking, the tension wire systems, etc.**

Said Lee Baker, National Infrastructure Manager, @Futsal

*"When embarking on an ambitious project such as this it is important to find suppliers who are experts in their fields and who can be trusted to deliver what is needed - when needed. Huck Nets are responsible for kitting out our arenas with the specialist indoor netting, a crucial part of each Arena as it is netting that divides the pitches and also protects the spectators... Huck also provide us with football goal nets. The advice, support and service given by Huck Nets is excellent"*
