

BEACONMEDÆS[®]

Part of the Atlas Copco Group

Company Overview

BeaconMedæS is the world's leading supplier of medical gas pipeline systems (MGPS). Our medical gas equipment, including medical air plant and medical vacuum plant, AGS systems and manifolds to pipeline components such as zone service valves and medical gas terminal units, are fully compliant to HTM02-01 and ISO7396-1 standards.

Through more than 60 years, as clinical practice has evolved, we have been at the center of the interface between the patient and the care giver, meeting the need for the increasingly complex array of life support equipment that is at the heart of the modern hospital. Through research, development and applied technology, coupled with a strong focus on customer service, our business is known best for the expertise that provide's our clients with solutions tailored to their particular needs.

Therefore our brand motto "**Life is in the Details**" is always at the forefront of our minds, in all areas of our business.

Vision

To achieve its goals through an unwavering commitment to exceed our customers' expectations for service, quality and innovative value added solutions for their changing needs.

Planning

We design and plan Medical Gas Pipeline Systems (MGPS) for both new and refurbished hospitals to the latest standards, HTM 02-01.

Products

We manufacture all elements of a MGPS equipment including medical air and medical vacuum plant, manifolds, valves and medical gas terminal units. In addition, we manufacture and supply 'leading edge' patient environment products such as medical trunking and ceiling pendants. Products are also CE marked to the European Medical Device Directive (MDD).

Quality

We are certified to ISO13485:2003 quality management system for the design, manufacture, supply, installation, commissioning and servicing of MGPS. OHSAS18001:2007 occupational health and safety management and ISO14001:2004 environmental management systems.

Installation

Our installation team offers unrivalled expertise with our products. With pre qualification through Safecontractor, CHAS and Constructionline you can be sure we take health and safety and quality service seriously. With a proven track record of delivering projects on time, from major PFI projects to small extensions and refurbishments, we can help you out. Following installation, we can provide preventative maintenance contracts and emergency repair services.

Maintenance

Medical gas service and support is central to everything we offer our customers. We offer full mainland coverage and emergency 24 hour call-out so day or night, 24-7. We have your medical gas systems covered. Employing time served technicians with unequalled experience in the MGPS industry BeaconMedæS can provide PPM contracts on both our own and other manufacturers equipment.

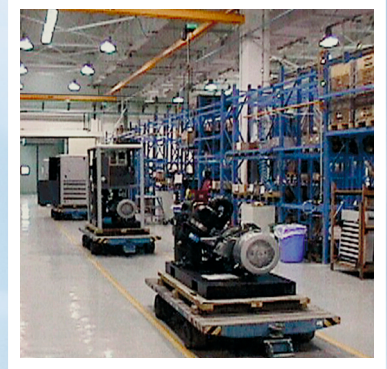

Whatever services you require, your medical gas pipeline system is always safe in our hands.
