# Which future would you choose?

## The time for action is now and it's in your hands...

Climate change poses a significant risk to our planet. It is critical that we collectively work towards lowering our carbon emissions to mitigate the impact of global warming, ensuring a liveable and prosperous future for all.

Simply by partnering with Slicker Recycling for your hazardous waste requirements, we will help you make **significant reductions to your carbon footprint**, minimising your impact on the environment.

Compared to Processed Fuel Oil (PFO) made from used oil, Slicker will help you **save over 184kg of CO<sub>2</sub> per 1,000 litres collected.**

Through our sustainable circular approach, we help preserve a valuable finite resource.

That's equivalent to the approximate annual carbon consumption of 7.5 trees!

The world's oil reserves are due to end in...

**2070**

### Slicker's Circular Economy

Virgin Oil Drilled

Base Oil Refined

New Lubricant Produced

Sold to Market

Used by Consumers

Collected by Another Service Provider

Processed Fuel Oil Produced

Burnt in the Marine & Energy Markets

## Waste Oil

Slicker are unique within the waste industry, thanks to our carbon-efficient, sustainable waste oil solution. The used oil we collect is re-refined at our state-of-the-art, waste-oil-to-base-oil facility. Here it is processed into a high-quality base oil product to be used again in the production of new lubricating oils. This is the most carbon-efficient process for the management of used oil and compared to other processes, will help reduce the affiliated carbon emissions by over 37%. Not only this, but customers will be directly supporting the circular economy and preserving valuable finite resources.

## Workshop Waste

Whatever your workshop waste, Slicker has the solution. We tailor each service to meet the requirements of your business and can provide a scheduled or on-demand collection service to meet your needs. We adhere to a zero-waste-to-landfill policy and will always strive to reduce, reuse or recycle the waste streams collected. Slicker collects a wide range of workshop waste streams including, but not limited to: used filters, antifreeze, aerosols, oil contaminated waste and much more.

## Shipping Waste

Slicker offers a quick and reliable shipping waste/MARPOL service to meet the most demanding of deadlines. Our team provide a reactive dock-side service for quick turnarounds, and will ensure your waste is recycled or recovered, minimising your impact on the environment.

## Slicker Interceptors

Slicker Interceptors, our specialist division, provide high-quality inspection, cleaning, and maintenance services for drainage systems and interceptors. We offer a comprehensive range of services, including but not limited to: interceptor maintenance/inspections, high-pressure water jetting, CCTV surveys, drain mapping, drain relining/patching, 24-hour emergency call outs, and many more.

## Total Waste Management

Consolidate your waste with Slicker's comprehensive and cost-effective Total Waste Management solution. We offer a wide range of services including but not limited to: WEEE Waste, Septic Tanks, Secure Shredding, Clinical Waste and Oil & Water.

## Parts Washers

Slicker's parts washers can efficiently clean oil & grease from a variety of parts and components. Our parts washers have their own self-contained micro-refinery, which not only provides clean solvent at the touch of a button, but also recycles the used solvent for re-use. With a sturdy cabinet design and comfortable working height, these machines provide an all-round user-friendly experience.

## Industrial Services

Slicker's Industrial Services Division offer a nationwide service, providing cost-efficient waste management solutions for large-scale industrial projects. Our team have years of experience and provides dedicated project management and industry-leading, expert advice. The range of industrial services we offer includes but is not limited to, site clearances, tank cleaning, tank removals/decommissioning, tank supply, shipping services, land remediation, emergency spill response, and many more.

# Don't just take our word for it...

**GROUPAUTO**  
UK & Ireland  
an Alliance Automotive Group Company

"Thanks to our partnership with Slicker Recycling, we now offer our members huge savings on their workshop waste they would not find anywhere else. Not only this but thanks to Slicker's eco-friendly approach, our members can simply and easily reduce their carbon footprint, minimising their impact on the environment. It's a win-win situation!"

**Maria McCullough**  
Garage Networks Manager

SINCLAIR GROUP

"Sinclair Group is committed to a new sustainable direction, looking at ways we can reduce our carbon footprint, and make positive environmental changes. Slicker Recycling has made it easy for us to achieve an immediate and significant reduction of our carbon footprint. Simply by switching to Slicker for our hazardous waste management, we are contributing to a sustainable circular economy and greatly reducing our emissions with ease."
