

## Traditional Meadowmat

Recreate the wildflower meadows of yesteryear in your own garden using Traditional Meadowmat.

A mixture of 34 perennial plants, all of them native to the UK that emulates a traditional, old fashioned hay meadow. Traditional Meadowmat likes to be in a sunny spot.

This colourful mix gives a nice balance of colours and textures. In summer time, the tall plants will gently sway in the breeze bringing movement into the garden.

Allow plants to grow and flower unchecked throughout spring and summer and then cut back when flowering finishes – usually around August. Mow periodically in Autumn and Winter to keep it neat. Never cut to below the minimum length of 10cm (4 inches).

Sown mix contains 70% flowering plants, 30% grasses by weight.

4 species of native grasses to provide perches for insects and food for the larvae of butterflies and moths.

30 species of flowering plants provide a rich source of pollen and nectar for a range of insects.

For best results install onto low fertility soil.

### Seedmix:

Autumn Hawkbit  
Birdsfoot Trefoil  
Bladder Campion  
Betony  
Catsear  
Common Knapweed  
Common Sorrel  
Common St Johns Wort  
Common Toadflax

Meadowsweet  
Musk Mallow  
Oxeye Daisy  
Red Campion  
Red Clover  
Ribwort Plantain  
Salad Burnet  
Selfheal  
Tufted Vetch  
Vipers Bugloss  
Wild Carrot  
Wild Marjoram  
White Campion  
Yarrow  
Sheeps' Fescue  
Slender Creeping Red Fescue  
Crested Dogstail  
Small Leaved Timothy

## Meadowmat for Birds and Bees

Keep the interest going all year round with Spring and Summer flowers and beautiful seedheads in the colder months of the year.

Meadowmat for Birds and Bees includes nectar-rich flowering plants with architectural seedheads that will feed the birds in winter.

A mixture of 40 perennial and biannual plants, all of them native to the UK, that benefit a wide range of wildlife. Meadowmat for Birds and Bees likes to be in a sunny spot.

Once it's established, Meadowmat for Birds and Bees is easy to manage. Simply allow the plants to grow, flower and set seed however they want to. Cut back the spent seedheads in late Winter, making sure that you remove all cuttings. Never cut to below the minimum length of 10cm (4 inches).

A mixture of 40 perennial and biannual plants, all of them native to the UK, that benefit a wide range of wildlife. Meadowmat for Birds and Bees likes to be in a sunny spot.

Sown mix contains 80% flowering plants, 20% grasses by weight.

4 species of beautiful native grasses to provide perches for insects and seeds for birds.

36 species of flowering plants provide a rich source of pollen and nectar for all sorts of beneficial insects including bees, butterflies and moths.

For best results install onto low fertility soil.

## Meadowmat for Woodland Shade

**Bring the subtle hues of woodland wildflowers into the shadier parts of your garden.**

We've blended 35 species of shade tolerant wildflowers with 3 species of woodland grasses to create this versatile type of Meadowmat. Included in the seedmix are early flowering violets, colourful campions, sweetly scented lady's bedstraw and cheery oxeye daisies.

Meadowmat for Woodland Shade will not tolerate really deep shade but it will thrive in the dappled shade of an orchard or shrubbery.

The upkeep for Meadowmat for Woodland Shade is the same as for Traditional Meadowmat. One main cut at the end of the flowering season with gentle mowing in autumn and winter if needed.

Sown mix contains 70% flowering plants, 30% grasses by weight.

3 species of beautiful native grasses to cover the soil and provide perches for insects.

35 species of flowering plants provide a splash of colour from late spring until early autumn. All species grow naturally in UK woodlands, hedgerows and meadows.

Meadowmat for Woodland Shade will tolerate bright sunlight but this blend of plants prefers to live in dappled shade.

### Seedmix:

- Autumn Hawkbit
- Betony
- Birdsfoot Trefoil
- Cats' Ear

- Field Scabious
- Kidney Vetch
- Lady's Bedstraw
- Meadow Cranesbill
- Meadow Vetchling
- Meadow Buttercup
- Meadowsweet
- Musk Mallow
- Oxeye Daisy
- Pepper Saxifrage
- Primrose
- Ragged Robin
- Red Campion
- Ribwort Plantain
- Rough Hawkbit
- Salad Burnet
- Sanfoin
- Selfheal
- Tufted Vetch
- White Campion
- Wild Carrot
- Wild Marjoram
- Wild mignonette
- Wood Sage
- Yellow Rattle
- Sheeps' Fescue
- Crested Dogstail
- Yellow Oatgrass

## Meadowmat for Cottage Gardens

**A glorious blend of native and non-native plants and grasses to attract and support pollinating insects. Meadowmat for Cottage Gardens will bring a beautiful splash of colour to your garden.**

A mixture of 28 perennial and biannual plants to evoke the look and feel of a traditional cottage garden.

In common with the other Meadowmat mixes, Cottage Garden is incredibly easy to establish and maintain. The Meadowmat system stifles any annual weed seeds in the soil so provided all perennial weeds are removed when you prepare the ground, this should reduce the need for weeding. You can deadhead if you want to – equally, you could allow seeds to develop and fall to the ground, enriching the mix for next year. In mid-late autumn, once the flowers are over, cut all the vegetation down to about 4 inches long, allow the cuttings to dry on top of the plants for a couple of days, then shake the seeds out and remove all cuttings.

Sown mix contains 80% flowering plants, 20% grasses by weight.

2 species of beautiful native grasses to cover the ground, provide varied textures and act as perches for beneficial insects.

26 species of flowering plants provide bright colours from late spring until early autumn. The majority of species are native to the UK but we have also introduced some cottage garden favourites that are not normally found in the wild.

Meadowmat for Cottage Gardens prefers to be planted in full sun.

### Seedmix:

Achillea Millefolium  
(native white flowers)

Achillea Millefolium  
Summer Berries  
(jewel colours)

Aquilegia

Autumn Oxeye

Bellflower

## Meadowmat for Gardens

**Ideal for bringing colour, movement and wildlife interest into your garden. Meadowmat for gardens has 23 species of native plants pregrown onto a blanket system. All you have to do is unroll it on to prepared ground, irrigate and watch it grow.**

Of all the different types of Meadowmat, Meadowmat for gardens has the brightest colour scheme. From the strong cerise colour of maiden pinks, through the sparkling white umbrellas of yarrow to the blue spikes of Vipers Bugloss, it's all about strong contrasts in tints and textures.

Butterflies and bees are naturally drawn to this nectar rich mix of native species. When you install Meadowmat for Gardens you will be rewarded with the hum of bumblebees and the delight of watching butterflies flit from flower to flower. You may also be lucky enough to have small birds visit your garden to partake of the nutrient rich grains that appear on the grasses in midsummer.

Sown mix contains 95% flowering plants, 5% grasses by weight.

1 native grass species provides contrasting texture.

22 species of native flowering plants. Some bright colours and some pastels.

Meadowmat for Gardens is remarkably easy to care for and will grow back year after year.
