SPECIAL
EDITION

COLD CURE PAINTS AND COATINGS

Formulated for high performance maintenance
in low and freezing temperatures.

We've created a cure for the cold...

We've used the latest resins and technology to reformulate our most popular products so you can use them in low and freezing temperatures. We've also gone a step further and developed a Specialist range which will perform and protect in freezing temperatures down to minus 20°C.

Whether you're painting, repairing or line marking in freezing conditions, our range will provide a long lasting, hard wearing finish that stands tough, even in the toughest environments.

Engineered by **watco**® to perform even in cold and freezing conditions.

Keeping on top of repairs and maintenance all-year round is essential for the upkeep of your commercial premises. Not only to uphold your businesses appearance but also for the safety of all visitors and employees.

Traditionally, most products will not cure in the cold, which can make completing projects during the winter months extremely problematic, especially if the area is unheated. That's why our chemists have formulated a dedicated range of paints and repair mortars specially formulated to excel in freezing conditions.

See our full range of cold resistant flooring products at watco.co.uk or scan the QR code.

CONCREX® SUB ZERO

Epoxy mortar for long lasting concrete repairs at minus 20°C.

When it comes to concrete repairs in unheated areas or freezing temperatures, ordinary mortars would fail, Thanks to its polyaspartic technology, Concrex Sub Zero takes the cold in its stride and provides a virtually indestructible, long lasting repair. Its exceptional strength will support thin section and feather edged repairs even in the coldest conditions.

Watco Concrex Sub Zero

For essential repairs in freezing temperatures.

Coverage: 1.2m² at 5mm thick per 10kg

Curing time: 48 hours at minus 20°C

FAST, POURABLE REPAIRS

In sub zero temperatures.

Our bestselling pourable repair mortar, Flowpatch, has been reformulated using a magnesium phosphate-based formula, allowing essential maintenance even in temperatures of minus 20°C.

Flowpatch's pourable formulation makes it extremely easy to apply and exceptionally tough. It can withstand weight up to 350kg and it cures within 2 hours, making it ideal for heavily trafficked areas which need to be put back into use quickly.

Flowpatch Sub Zero

Fast and strong repairs for heavy wear areas in minus 20°C.

- + 10kg **£89.85** (excl. VAT)
- + 25kg **£223.75** (excl. VAT)

[SHOP NOW](#)

Features

- ✓ Easy to use rapid dry formula
- ✓ Takes forklifts in just 2 hours
- ✓ Just add water, mix and pour
- ✓ Allows for essential maintenance even in freezing conditions

Also in our repair range

Watco Bitu-Mend

Easy and instant repairs to potholes in concrete and asphalt. Our bitumen based material is soft and flexible when applied to allow for easy tampering. The material then begins to harden quickly, leaving you with a long lasting repair.

- + 25kg **£68.85** (excl. VAT)

COATINGS FOR USE IN THE COLD

Watco pioneered the development of Polyaspartic resins for everyday use in Europe. This innovative two-part floor coating technology paved the way for new and improved product application and performance, including:

- **Cold Curing** - allowing interior and exterior projects to continue, even at minus 10°C.
- **UV resistance** - resistance to chalking, fading or peeling after time in the sun.
- **Chemical resistance** - the ability to defend against a wide range of commercial and industrial chemicals.
- **Fast curing** - allowing two coats to be put down in a day, saving you time and money.

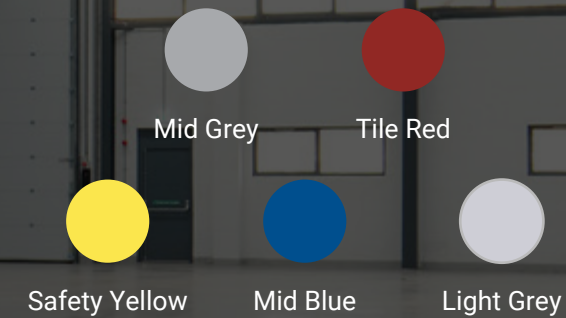

Polyaspartic resin technology has changed the face of floor coatings. Most notably, providing paints and coatings that can cure in extremely cold temperatures, as low as 20°C.

The temperature of a floor is typically 8°C lower than the air temperature so when temperatures drop, it's usually extremely difficult to paint a floor. Whether it's freezing weather, unheated areas or due to works in cold storage or freezer rooms, polyaspartic coatings will give a high quality, long lasting finish, even in extreme temperatures.

Features

- ✓ Allows essential maintenance during the winter
- ✓ Ideal for use in chiller rooms and loading bays
- ✓ Excellent abrasion and UV resistance
- ✓ Withstands heavy wear and tear

Watco Cold Set Coating

A high performance coating that can be applied at minus 10°C.

+ 2.5L £151.70 (excl. VAT)

FASTER PAINTING IN THE COLD WITH WATCO FASTCOAT

If operational pressures mean a floor cannot be out of action for long while maintenance takes place, a fast drying formulation is essential. Our specialist rapid drying coatings have changed the face of floor maintenance. Polyaspartic resin products are cutting edge and out-perform epoxy resins in a number of respects.

The coatings can be recoated in as little as 4 hours and are ready for traffic in 6 hours. This means 2 coats can be applied in 1 day and be ready for use the next. Abrasion, scratch and UV resistance are all also superior.

Fastcoat
The fastest drying performance coating you can buy.

- Minimise downtime
- Two part polyaspartic resin technology
- Excellent UV and chemical resistance
- A second coat in 2 hours saves time and costs

+ Original 2.5L £151.70 (excl. VAT)
+ Anti Slip 2.5L £157.05 (excl. VAT)

LINE MARKING AND SAFETY TAPES

Watco Toughline uses polyaspartic resin technology for a high quality, highly wear-resistant line marking paint that can be applied as low as minus 10°C.

Features

- Perfect line marker for unheated warehouses, walk in fridges, cold stores and loading bays
- Resists chalking, fading, weathering and UV discolouration
- Takes heavy wear and tear
- Excellent chemical resistance

Curing Times

	5°C	0°C	-10°C
Recoatable	10 - 12 hrs	16 hrs	30 hrs
Light Traffic	18 hrs	24 hrs	36 hrs
Heavy Traffic	24 hrs	36 hrs	48 hrs

Watco has a wide range of line marking and safety tapes because we know that it's not always possible to use a coating to mark out areas or highlight hazardous areas. Applying a coating is not always possible,

especially on busy outdoor steps where frequent access is required. Our range of tapes are extremely durable and long lasting with excellent adhesion to surfaces even in cold conditions.

Heavy Duty Line Marking Tape

Long lasting tape for heavy wear areas.

- Ultra durable compared to conventional floor tapes
- Self adhesive backing
- Chamfered edge to prevent tripping

+ From £116.30 (excl. VAT)
