Engineered by **watco**[®] for superior chemical resistance.

Our chemical resistant coatings are nothing short of exceptional. In fact, they are so good we've incorporated them into our Specialist range. With any Watco floor coating you will get a good level of resistance to everyday chemicals and cleaners, but we've taken things to the next level. Our specialist chemical resistant formulations have been engineered to stand tough in the most extreme industrial environments.

BUND SEALER

Extreme protection from spills in chemical storage areas.

Innovation is in our DNA, which is why we have pulled out all the stops with Watco Specialist Bund Sealer. The two-part, thick epoxy resin formula has exceptional resistance to chemicals such as Sulphuric Acid and Skydrol – making it reliable in the event of a major chemical spill.

Bund Sealer's unique glass flake reinforced structure gives it the ability to fight off an aggressive chemical attack to avoid extreme damage, harmful spills, and costly repairs. In just one, easy to apply coat, you can seal and protect your bund areas with our superior chemical resistant coating.

Watco Bund Sealer + 4L £221.05 (excl. VAT)

RESIFLOW

A high build,
self-levelling screed.

Features

- ✓ Easy clean, low maintenance finish
- ✓ Excellent resistance to oils and general chemical spillages
- ✓ Takes heavy forklift traffic
- ✓ Self-levelling epoxy resin finish

We have developed an advanced formulation that puts Resiflow Chemical Grade into a class of its own. This one coat, high build, self levelling epoxy resin finish, leaves a smooth, exceptionally high gloss surface, which has excellent chemical resistance. It is our ultimate floor covering for durability and appearance.

Resiflow Chemical Grade

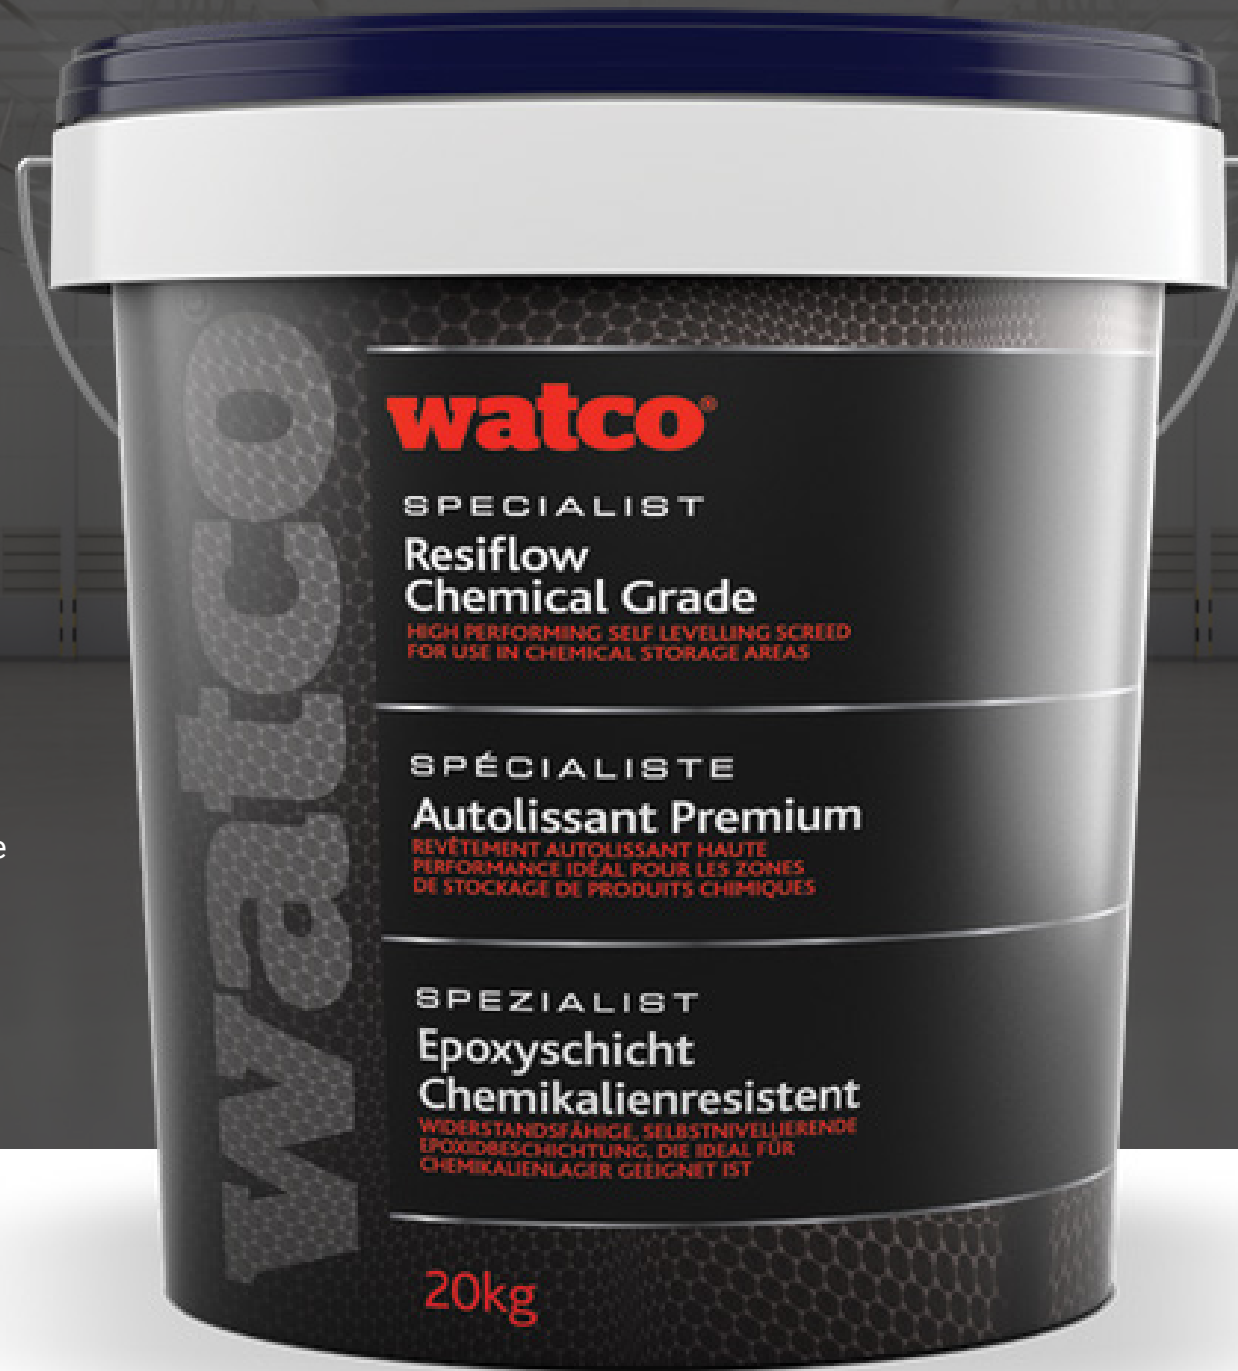

Self levelling epoxy with excellent chemical resistance.

Coverage: Approx 10m² at 1mm thick and 5mm² at 2mm thick.

Curing time: Heavy traffic in 48 hours.

+ 20kg £232.15 (excl. VAT)

[SHOP NOW](#)

How to apply Watco Resiflow

1. Mix the resin and curing agent together
2. Add the powder and mix thoroughly
3. Use an electric drill for an even consistency
4. Pour the mixture onto the surface
5. Spread the mixture evenly with the applicator
6. Remove any air bubbles with a spiked roller

For more information on how to apply Resiflow Chemical Grade scan the QR code or visit watco.co.uk/products/watco-resiflow-chemical-grade

PLANT ROOM COATING

Protect your floors against leaks and spillages.

Watco Plant Room coating provides a flexible, watertight barrier on plant room floors to avoid spillages and leaks causing damage. Water from a burst pipe or leaking tank can seep through any joints or cracks in the substrate and cause unnecessary damage to the rooms below.

Plant Room Coating is a flexible polymer coating that fills cracks, seals and waterproofs in just one coat.

Features

- ✓ Thick and flexible waterproof coating
- ✓ One coat fills and seals cracks in floors
- ✓ Contains leaks and spills
- ✓ Takes heavy wear and tear
- ✓ Flexible formulation resists cracking and peeling
- ✓ Excellent adhesion

Plant Room Coating

Coverage:
Approx 12m² per 25kg at 1mm thick.
Curing Time:
Heavy traffic in 72 hours at 15°C-20°C.

+ 25kg **£155.65** (excl. VAT)

CONCREX® ACID STRENGTH

An epoxy repair mortar
with a unique twist...

It's not just our coatings that have been developed with superior chemical protection. Watco Concrex Acid Strength is our most versatile, chemical resistant epoxy repair mortar. You can use it just about anywhere, including floors, steps and ramps in areas where chemicals are used or stored.

Strength, reliability and performance are expected from any product in the Concrex range, and that's true of our Acid Strength version. The mortar can be applied to a feather edge for tough, permanent repairs. Combined with the ability to resist to 95% Sulphuric Acid, you can be confident any repair made with Concrex Acid Strength is guaranteed to last.

Concrex Acid Strength + 10kg £146.20 (excl. VAT)
