The advanced design reduces heat penetration by blocking over 65% of the suns infrared heat.

- Helps prevent conservatories from overheating
- Energy saving - reduction in air conditioning costs
- Smooth attractive look
- Light & easy to install, yet strong and durable
- Prevents UV damage to humans, furniture and other objects
- Weatherproof for all climates

Roofing Felt

We Stock Esterflex SBS torch-on is a range of polyester based torch-on cap sheets & underlay, coated with a high quality polymer modified SBS bitumen coating. The underside of Esterflex SBS and Mineral Esterflex SBS is protected by Polyflam a special polyethylene film which melts upon torching.

Our Ultra Lightweight Underlay uses Reoxthene technology which allows bitumenous polymer membranes to have greater thickness but with a weight reduction of up to 40%. This means improved work ability and higher daily laying output, with lower transport and handling costs.

Aluminium Composite

ALUPANEL

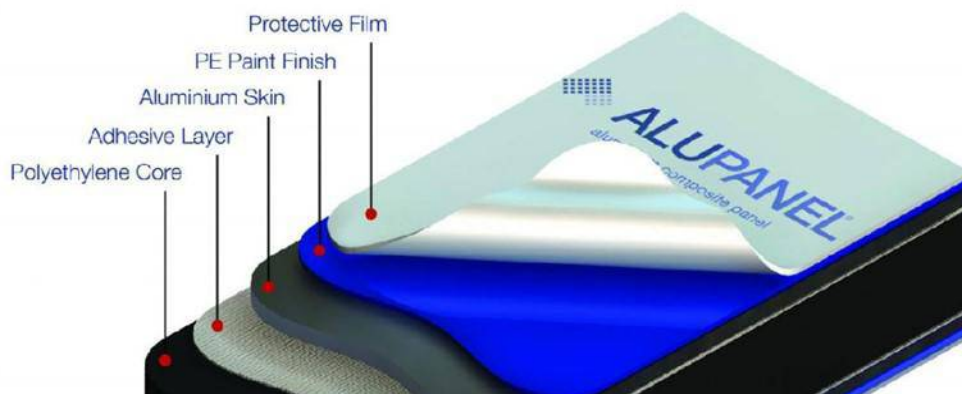

aluminium composite panel

ALUPANEL® aluminium composite sheet consists of a polyethylene core sandwiched between two 0.3mm aluminium skins. With all the benefits of aluminium composite and the full range of colours and finishes, ALUPANEL® combines durability with flexibility.

Particularly suited to high wear environments, this formable and dual-sided sheet has one satin finish surface and the other in 75% gloss.

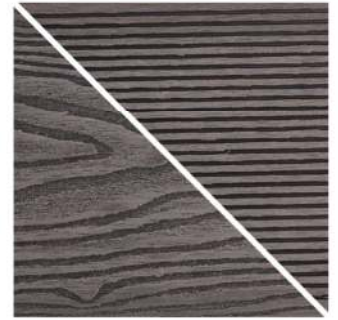

Alupanel comes with a 5 year external guarantee including brushed aluminium (other brushed and mirror finishes are guaranteed for internal use only).

Premium Double Faced Decking

WPC Range of Decking, now featuring Double faced with a wood-grain and grooved option in one board.

WPC Decking is a revolutionary decking with a unique composition to replicate wood without the maintenance and hazards of the traditional timber deck. It's designed to be maintenance free, safe, easy to install and environmentally friendly. We offer a 10 year guarantee as well as offering 5 different colours, 2 designs and 2 lengths, as well as a whole range of matching accessories.

Features

- Made using Eco Friendly materials
- Maintenance free requires no upkeep
- Highly anti-slip in the wet
- Does not rot, splinter or warp
- Does not host algae growth
- UV weather stable
- Resistant to food and drink stains
- Intricate natural woodgrain detail
- Invisible 'host head' fixing
- Wide choice of designs and colours
- Class 1 fire retardant

MBP COMPOSITE DECKING

Double Sided Hollow Decking Board (Woodgrain and Grooved)

D: 25mm W: 145mm L: 3660mm

Scrubbing and staining your deck every year is a thing of the past with composite wood decking, It comes in four natural shades that resist the fading caused by sunlight and air pollutants. The colour is also constant through the entire core of the product so composite wood's appearance with regard to its colour has greater longevity, with something as simple as an annual jet wash being enough to uphold this level of appearance.

Clever concealed fixings give a neat, flawless finish which can be installed quickly and easily making composite wood the ideal choice.

BENEFITS OF COMPOSITE HOLLOW DECKING

20-year guarantee

Natural look

Durable and long lasting

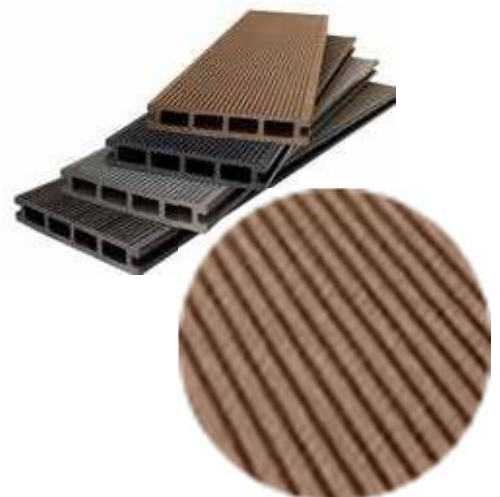

Slip resistant

No painting or staining

Seamless installation with hidden fixings

Premium Composite Fencing

Wood composite is a durable and ecological alternative to hardwood. Its made from a mixture of wood flour and PVC, which provides an extremely durable, colourfast garden fencing that does not warp and is much more weather resistant than solid wood.

It does not require treatment with oil, solvents or cleaning products, The estimated life span exceeds that of conventional wood and afterwards is fully recyclable, therefore it contributes to the protection and conservation of the tropical rain forests.

Roof Domes

Our rooflights are manufactured to the highest standards and are designed to give maximum weather protection and light transmission. Extruded from high quality UPVC this range offers an integrated water management system to shed water to the outside of the rooflights. They are manufactured from UV protected Polycarbonate in a choice of profiles such as Domes and Pyramids. Polycarbonate offers high impact resistance as well as a variety of glazing options in either clear, opal, diffused or bronze tint.

A Range of Fixed and Opening Domes are available from stock.

Custom Domes can be made in 10 working days

Premium Lantern Roofs

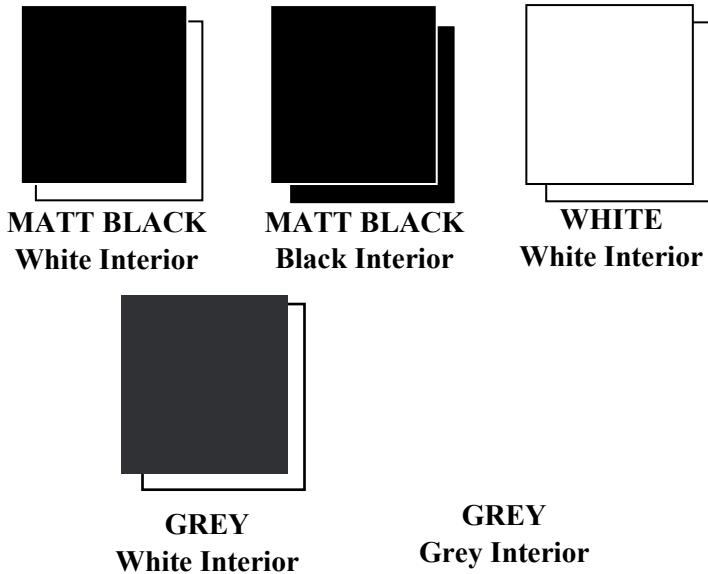

THE ALUMINIUM SKYPOD

Architectural aesthetics with added protection against the elements

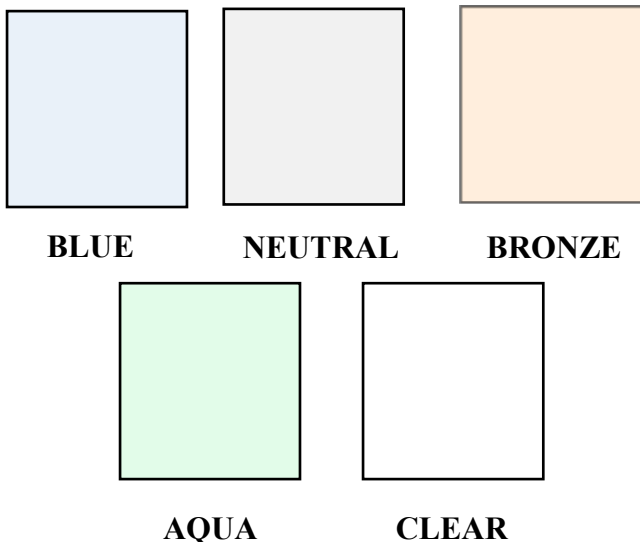

Our premium roof lantern offers thermally broken aluminium ridge, ring beam and aluminium rafter top caps. This means it also offers greater protection against the harsh summer mid-day sun. All internal bars are capped in the conventional way with PVC-U and are available in black, white or grey finish.

The system has a fixed roof pitch of 20° and is supplied in a choice of five self cleaning, temperature controlling glass options.

Anthracite Grey/ Anthracite Grey is not available for 35° pitch
Black and grey internal finishes are produced by a spraying process

Timber Frame Garden Rooms

A combination of Cladding, Door and Window Choices

The modern natural appearance of these buildings make them an attractive addition to any garden. They have a pressure treated timber frame, covered with low maintenance composite cladding.

The inside is a blank canvas of timber walls and floor ready to add your own finish. Alternatively opt for an insulated and boarded finish and customise with our optional interior pack.

SIZE CHART
