The flow rates in the column BS 12056 have been calculated in accordance with BS EN 12056 - 3: 2000 where 90% of full flow is used as a safety factor (freeboard).

A rainwater is suitable in terms of performance as long as the carrying capacity of the chosen configuration exceeds the calculated run-off of rainwater from the roof.

Above Ground Soil & Waste Systems

Floplast offer a comprehensive choice of soil & waste systems and products, in a range of sizes and colours, to suit all tastes and applications.

- Maintenance Free
- Consistent high - gloss finish .
- Tough and durable.
- Lightweight for ease of installation.
- Compatible with most other existing materials and systems.
- Manufactured to British/ European Standards.

NEW! GROUNDGUARD

GroundGuard is a linked paving system, manufactured from Polyethylene, which provides a durable safe and eco-friendly surface for grass reinforcement, ground stabilisation and gravel retention for pedestrian and vehicle access areas.

It comes in a pack of 20 tiles (each measuring 390 x 390 x 40mm) which will cover an area of 3 square metres (eg. a 2m x 1.5m rectangle).

System Features

- Simple to install.
- Tested in excess of 200 tonnes per square metre spread load.
- Easy clip design.
- Made from polyethylene.
- GroundGuard filled with grass or gravel provides a rainwater run off that is compliant as a SUDS source control.

Ground Guard is suitable for:

- Additional/overflow grass car parks.
- Walkways and disabled access routes.
- Golf buggy paths.
- Driveways and residential lawn parking.
