About Bodet Limited

Bodet has been offering clocks & class change systems and Time and Attendance solutions for over 25 years.

Bodet's devotion to constant improvement has enabled Bodet to become the European leader in the Time Management sector.

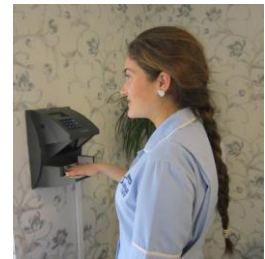

Solihull Care provides care in their Care Home with nursing for the citizens of Solihull and the surrounding areas. As a member of the National Care Forum, it is recognised as a company committed to staff development.

Marion Vickers, Payroll Administrator at Solihull care explains how their care staff provides services within a professionally qualified management structure through Bodet's Time and Attendance System: **Kelio Integral 300**.

A tailored solution for Care Homes

Bodet is the most relevant time and attendance manufacturer for the care home industry with hundreds of care home customers across Europe: *"When we decided to monitor the time and attendance of our staff, we had a look at several systems and Bodet was the best option"* says Marion.

In care homes, employees are always working on different shifts and staff management can be complex: *"We wanted the system to provide us instant time and attendance data for payroll. Before, we had to calculate every shift our employees did for payroll. Since we installed Bodet's solution, you can see the overall number of hours worked quickly. **It saves me a lot of time calculating payroll.**"*

An easy-to-use system with state-of-the-art services

Marion Vickers was also very impressed with the standard of training and support from Bodet: *"**The implementation of the system was really good and the training was fantastic, I was able to deal with the system on my own within a few days, it's simple, and the support is very good as well.**"*
