LOCKDOWN SCHOOL ALERT SYSTEM

SECURE YOUR STAFF & PUPILS AT THE TOUCH OF A BUTTON

Broadcast a unique, customisable lockdown alert with our Harmonys System.

Simple and easy to install, increase communication during fire alarms and other emergency situations.

A range of static and remote trigger methods can be used to broadcast emergency alerts, such as lockdown, evacuation and panic alarm:

- Multi-button Control Panel
- Wireless Remote Control
- Phonecall using GSM Control Box
- Harmonys Notify, an app for smartphones and PCs

LOCKDOWN SCHOOL ALERT SYSTEM

WHAT EVENTS COULD TRIGGER A FULL OR PARTIAL LOCKDOWN?

- Intruder on school site with potential to pose a risk
- Incident or disturbance in the local community
- Warning of air pollution
- Major fire in the vicinity of the school
- Dangerous dog roaming loose

WHAT ARE THE DIFFERENCES BETWEEN FULL & PARTIAL LOCKDOWN?

PARTIAL LOCKDOWN:

During a partial lockdown, activity outside the school would cease. Staff and pupils remain inside with external doors and windows locked, however free movement is normally permitted, depending on circumstances. The school is ready to move to a full lockdown should the situation escalate.

FULL LOCKDOWN:

In a full lockdown, pupils would return immediately to their agreed lockdown location, such as the nearest possible classroom or assembly hall, and remain within it. External doors and interior classroom doors would be locked, and windows and blinds drawn. Classroom doors are barricaded with furniture if possible. Pupils would be encouraged to sit quietly and out of sight. A register would be taken and then communicated to an administration centre.
