

CQS assess the relevant activities of YOUR business against the requirements of the appropriate Standard. We develop a programme to remedy any areas that fall short of the standard and work with you to rectify them (normally an initial assessment takes between one and two days).

You will receive your Management Systems Manual plus all the other necessary aids to help you take the best advantage of your achievement. Upon certification you will receive:

- Relevant Certificate
- Management Systems Manual and Supporting Template Documentation
- Information Pack
- Electronic Logos for use on stationery, marketing materials, vehicles, premises and equipment
- Your business entered into the CQS register of certified companies

External audits are required to verify your Certificate.

Certification is the acknowledgement of your system by a qualified third party.

The Road to Certification

Completed...Quite Simply

The Road To Certification

ISO 9001:2015 Quality Management

What is ISO 9001:2015?

ISO 9001:2015 is a standard of requirements against which your Quality Management System can be evaluated. It is adaptable and non-prescriptive allowing it to be applied to any size business.

Benefits of ISO 9001:2015 Certification

By demonstrating and verifying your compliance to the requirements of ISO 9001:2015, you are actively advertising your company's commitment to quality, traceability and continual improvement. These are key criteria in convincing potential clients to utilise your products and services. It also promotes the development of continual improvement, customer satisfaction and traceability through leadership, consistency and risk prevention.

Other advantages could include:

- Increase in profits by reducing wastage and errors
- Increased sales - new clients sourced and reduction in lost orders
- Effective Management - less time wasted
- More prospects realised - opening doors restricted to certified suppliers
- Greater customer satisfaction

"CQS's particular strengths are their skilled and capable staff, with their proactive professional approach to the service provided, it's more than transparent how passionate they are with what they do on a daily basis. I can state that Interserve Engineering Services would recommend CQS as an appropriate partner if you are seeking any standards accreditation or auditing."

Interserve Engineering Services Limited

ISO 14001:2015 Environmental Management

What is ISO 14001:2015?

ISO 14001:2015 requirements help to define and establish controls to reduce your company's environmental impact in its everyday operations. Targets and objectives must be defined and legal requirements met in order to maintain compliance.

Benefits of ISO 14001:2015 Certification

Effective implementation of an Environmental Management System could result in a reduction in pollution, a minimisation of waste and efficient use of raw materials and energy. This, in turn, will promote the ethical standing of your business, reduce costs and ensure you guard against legislative liability.

Other advantages could include:

- Lower insurance costs
- Reduction of environmental incidents
- Better environmental focus
- Cost savings through a reduction in the usage of gas, electricity and water

Certification in 30 Days

CQS has a refreshing approach to the Certification Process. This encompasses assistance with documentation whilst undertaking the initial assessment, eliminating the need for you to engage potentially expensive consultants costing many thousands of pounds. This concept means CQS can:

- Dramatically reduce the cost of certification
- Achieve certification quickly and efficiently
- Eliminate all unnecessary jargon
- Realistically reduce the amount of management time involved
- Charge a sensible external audit fee to maintain your certification

ISO 45001:2018 Health & Safety Management

What is ISO 45001:2018?

ISO 45001:2018 is a standard of requirements against which your Health and Safety Management System can be evaluated. You are required to identify the risks associated with your operations and mitigate their impact.

Benefits of ISO 45001:2018 Certification

By achieving ISO 45001:2018 certification your company will be actively demonstrating your ability to identify risks and reduce them to the best of your ability. Particularly now with the Corporate Manslaughter Act, it is essential that all companies do their utmost to ensure that no injury or fatality is caused as a result of negligence.

Implementation of the requirements will give added confidence to your customers and staff by promoting a Health & Safety culture. Management commitment to the system will ensure that standards are maintained along with compliance to applicable legislation.

ISO 27001:2013 IT Security Management

What is ISO 27001:2013?

ISO 27001:2013 deals with all aspects of information security within your organisation. This can vary from physical to intellectual and electronic security, establishing what is critical to you and your client's business and how you therefore control and protect these aspects.

Benefits of ISO 27001:2013 Certification

Effective implementation of an Information Security Management system ensures you mitigate the risk of a data security breach and in the event of an information security breach establish a plan to get your business back up and running with as little impact as possible.

By meeting the requirements of ISO 27001:2013, clients will be satisfied in the knowledge that you operate a system that will secure information provided by them and managed by you.

Consultancy Services

CQS can offer consultancy for clients not certified by ourselves. We can help with the implementation, internal audit, review or purely on an advisory basis for any Standard we advertise.

Management and implementation of your systems can be a costly exercise and use up valuable resource within your business. CQS can take away some of this burden by providing you with our expertise and reducing the amount of internal resource required to ensure that your system is being implemented effectively.

Contact us with your requirements and we will provide you with the solution you require.
