2018 Lux Wedding Industry Award

Winners – Communic8 Hire

Although we're a fairly new startup, being just over 2 years old. We recently won another award which came to us via the Lux International brand.

Having previously won an award in 2017 in their 2017 Wedding Awards, this time we've won in their Industry Award for our services to Weddings for Sound and Lighting Equipment.

We were contacted by Danielle from Lux with the fantastic news around late March. It's a fantastic heart warming feeling to know that your work is rewarded when we win awards like this, so thanks to all our clients.

A bit of background into the 2018 Wedding Industry Awards

The 2018 Best of the Wedding Industry awards are a brand new programme that was launched this year (2018) and they have ran similar programmes in the past, however this programme is purely merit led, as opposed to nomination based like the award we won last year for radio communications.

The awards judging criteria are mainly based upon facilities and service excellence provided by the participant. Size of a service or company is not taken into consideration during the research process. For our research team to assess who they believe are most deserving of taking part in this award, they take into consideration several factors and criteria which include, but aren't limited to:

- Company growth/profile
- Previous accolades won
- Social media presence
- Client reviews/testimonials

So 2 years in and we've won 2 awards. We've grown the business in the last 2 years from a tiny hire fleet, consisting of a 4 radios, a small amount of speakers and microphones plus lighting equipment into a business that's hired equipment around the UK and supplied some fantastic customers. It's been a fantastic journey so far. For what was a little hire company in the depths of deepest, darkest

Wales, we're proud of the reviews, clients and awards we're making. Here's to many more clients, jobs, challenges and much more!.

Awards:

2017 Lux Wedding Award
