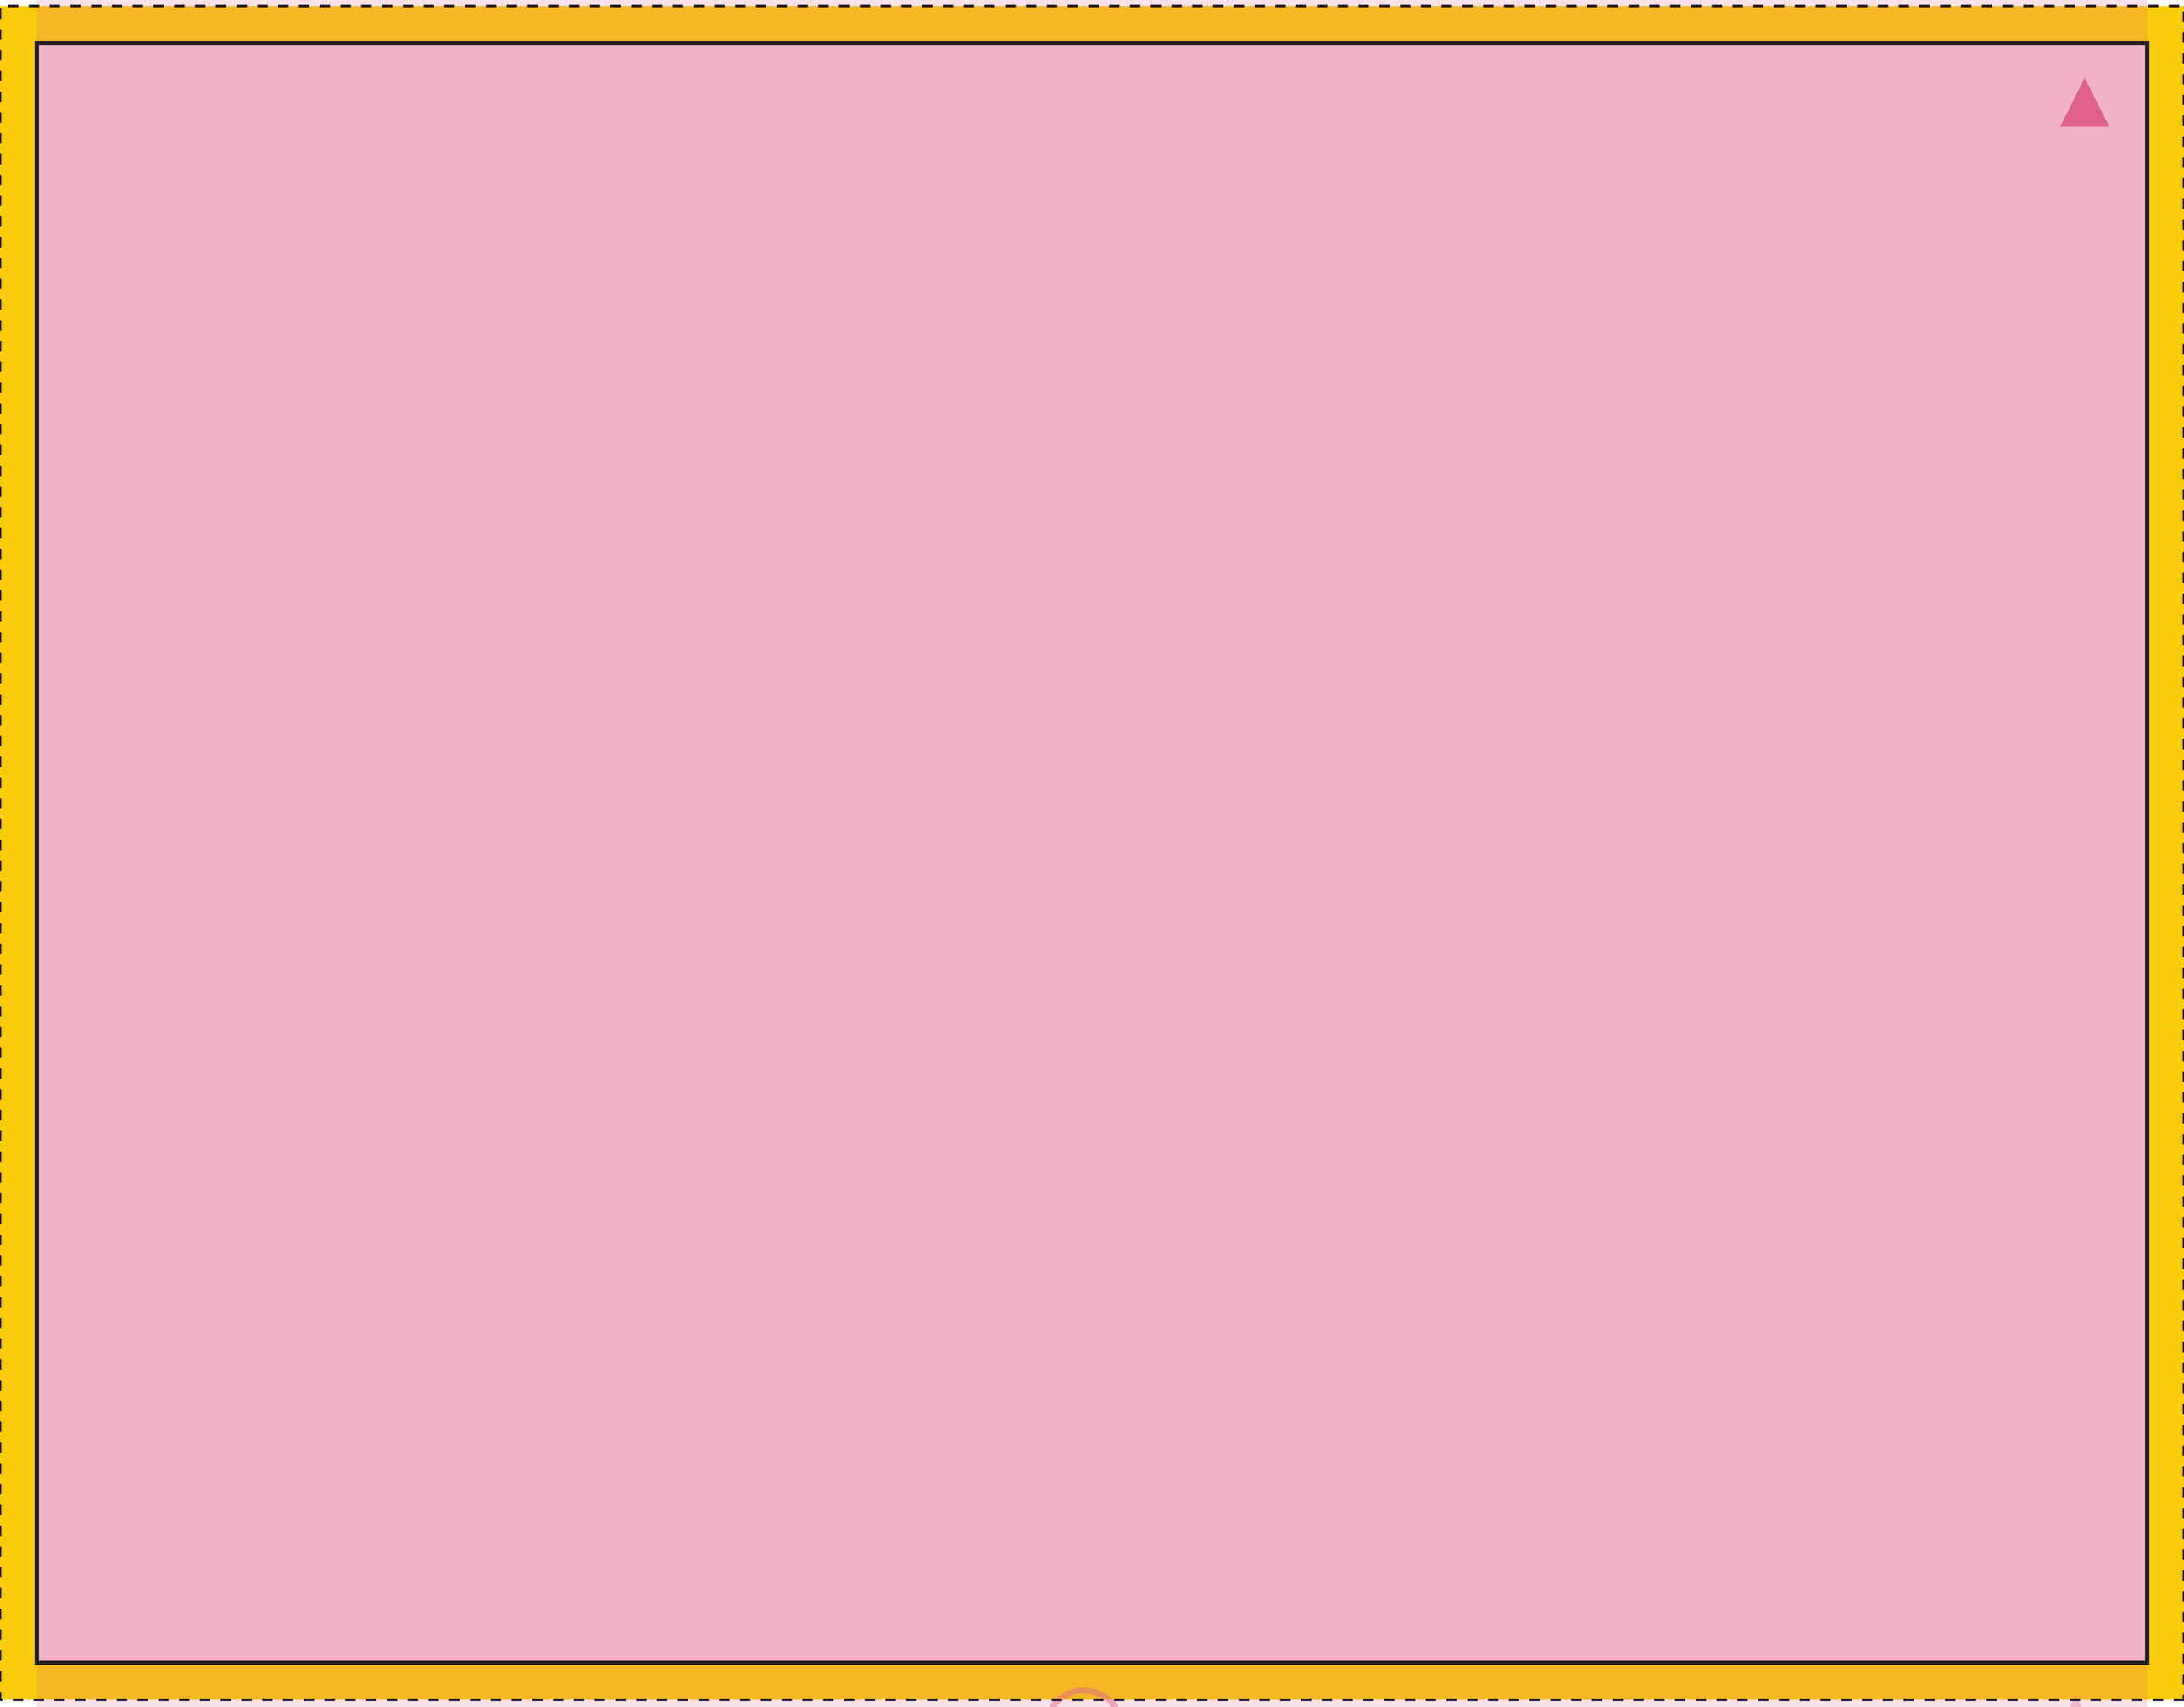
Outdoor Display.

Key:

- Front Artwork
- Reverse Artwork
- **Orientation** (This should be in the top right corner of your artwork).
- **Bleed** (The colours in your artwork should extend to fit this area to ensure no white lines when the canvas is trimmed).
- **Safe Zone** (keep graphic elements such as images or text within this area, background needs to extend to bleed edge).

1

2

The top and bottom sections of the reverse artwork need to be placed inverted (as shown) on the front design. This will ensure that, once the pole pockets are folded and sewn, both sides will feature your artwork in the correct orientation allowing the barrier to function as intended and maximise the available image area.


Note: Please ensure you hide this layer once you are happy with your artwork.
