

# CLEANROOM GLOVES

Our range of cleanroom gloves is suitable for all cleanroom classes and designed to give the customer the widest choice available from recognised and established leading brands. The most popular are shown in this section giving you easy access to a selection of materials, lengths and formats plus the option of sterile or non-sterile depending on the designated use.

## Gloves Material

**Polychloroprene Gloves** | High level of protection and strength without compromising the fit. Ideal upgrade for operators with latex allergies.

**Latex gloves** | Traditional close fitting for good dexterity and touch.

**Nitrile Gloves** | Strong tear resistant material without latex proteins.

**Vinyl Gloves** | Economical gloves where a close fit is not essential but basic hand coverage may be required.

## Glove Brands

**Shield Scientific** | A wide range of latex & nitrile sterile & non-sterile gloves in various cleanliness levels and lengths.

**Kimberly-Clark** | The Kimtech G5 & G3 latex & nitrile sterile & non sterile gloves in addition to the purple nitrile range.

**SkinGuard** | Supplied by our parent company the full range of SkinGuard polychloroprene, latex, nitrile, sterile & non sterile gloves are available.

**Bioclean** | These gloves are not shown in this catalogue but include the Biotac, Legacy, Advance, Maxima, Fusion, N-Plus and P-Zero ranges.

**Ansell** | In addition to the full range of Bioclean gloves we can supply the traditional Ansell brand of latex, nitrile and neoprene Dermashield gloves.

**Halyard \* Purezero \* Nitrile Gloves** | Available in sterile & non sterile suitable for the Cleanroom Environment

## ShieldSkin Xtreme Non-Sterile Gloves

Shield Scientific offer a full range of gloves to suit the needs of all high technology sectors that have cleanrooms or laboratories. Their ethos is "Compliance Comfort and Protection" across their unique range of latex and nitrile gloves in a choice of cleanliness levels.

Also available but not shown are the ShieldSkin range of boxed latex & nitrile gloves including the SHIELDskin CHEM red Neo Nitrile.

## Finger Cots & Miscellaneous Gloves

Finger Cots are ideal for areas where full hand coverage is not required but protection from harmful skin oils is needed. Four latex versions plus a nitrile finger cot are available.

Where conventional cleanroom gloves are either not suitable or not required we have chemical resistant gloves plus fingerless glove liners which act as a barrier between the working gloves and the hands whilst providing the dexterity required.

Also available but not shown are a complete range of Special Purpose Gloves or Gloves made in other materials.

Part Number	Description	Sizes	Quantity
FC2-1/2/3/4	Mechanically Cleaned Finger Cots, white (Mechanically Cleaned Finger Cots, excess powder removed)	S, M, L, XL	10 Gross (1440)
FC5-1/2/3/4	Washed Finger Cots, tan colour (Washed Powder Free Finger Cots, any residual powder removed)	S, M, L, XL	10 Gross (1440)
FC7-1/2/3/4	Anti-Static Washed Finger Cots, pink colour (Washed Anti-Static Finger Cots, for static sensitive areas)	S, M, L, XL	5 Gross (720)

## Isolator Gloves & Sleeves

CES are pleased to offer the market leading Piercan range of gloves and sleeves in various formats and materials as summarised below. Each can be supplied sterilised and / or decontaminated.

**Drybox gloves:** Also known as isolator gloves, these are one-piece seamless gloves that are used to handle objects in an enclosed environment.

**Sleeves:** Sleeve systems offer the operative an ergonomic fit and perfect freedom of movement.

The sleeve is connected to an ELS glove via the Secure Cuff Ring .

**ELS gloves** (or short gloves): ELS gloves are connected to sleeves.

### CSM

- Very good ability to withstand chemical products and sterilising agents.
- Highly resistant to ozone and UV rays.
- Very good ability to withstand sterilisation.

### BLACK ESM

- Excellent ability to withstand chemical products and chemical sterilising agents.
- Antistatic.
- Good mechanical properties.
- Excellent ability to withstand steam sterilising.

### BLACK & WHITE EPDM

- Excellent ability to withstand chemical products and chemical sterilising agents.
- Good mechanical properties.
- Excellent ability to withstand steam sterilising.
- Specially adapted for the constraints of a pharmaceutical laboratory in terms of the exterior colour (white).

### POLYURETHANE

- Excellent mechanical properties (punctures, tears, abrasion)
- Highly resistant to ozone and UV rays

### POLYURETHANE / CSM

- A glove that combines mechanical properties (polyurethane) with chemical resistance (CSM)
- Good resistance to chemical sterilising agents (CSM)

### CSM / POLYURETHANE/ CSM

- Excellent ability to withstand chemical products
- Good mechanical properties
- Highly resistant to ozone and UV rays
- Very good ability to withstand chemical sterilising agents

### NEOPRENE

- Good general resistance to chemical products
- Good mechanical properties
- Good resistance to ozone and UV rays
- Good flexibility and dexterity
- Good technical and cost-effective compromise

### HIGH PERFORMANCE BUTYL

- Highly impermeable to liquids and gases
- Good ability to withstand chemical products
- Highly resistant to ozone and UV rays
- Good flexibility and dexterity
- Antistatic

### NATURAL RUBBER

- Excellent flexibility and dexterity
- Low cost

### LEAD FREE LOADED POLYURETHANE

- Excellent protection from ionising radiation (gamma and beta rays)
- High mechanical protections
- Highly resistant to ozone and UV rays
