# We Build Labs

Founded over 40 years ago Klick has maintained its core values as a family business whilst developing into a highly reputable and reliable provider of cutting edge laboratory furniture for a variety of disciplines including research, industrial, healthcare and university laboratories.

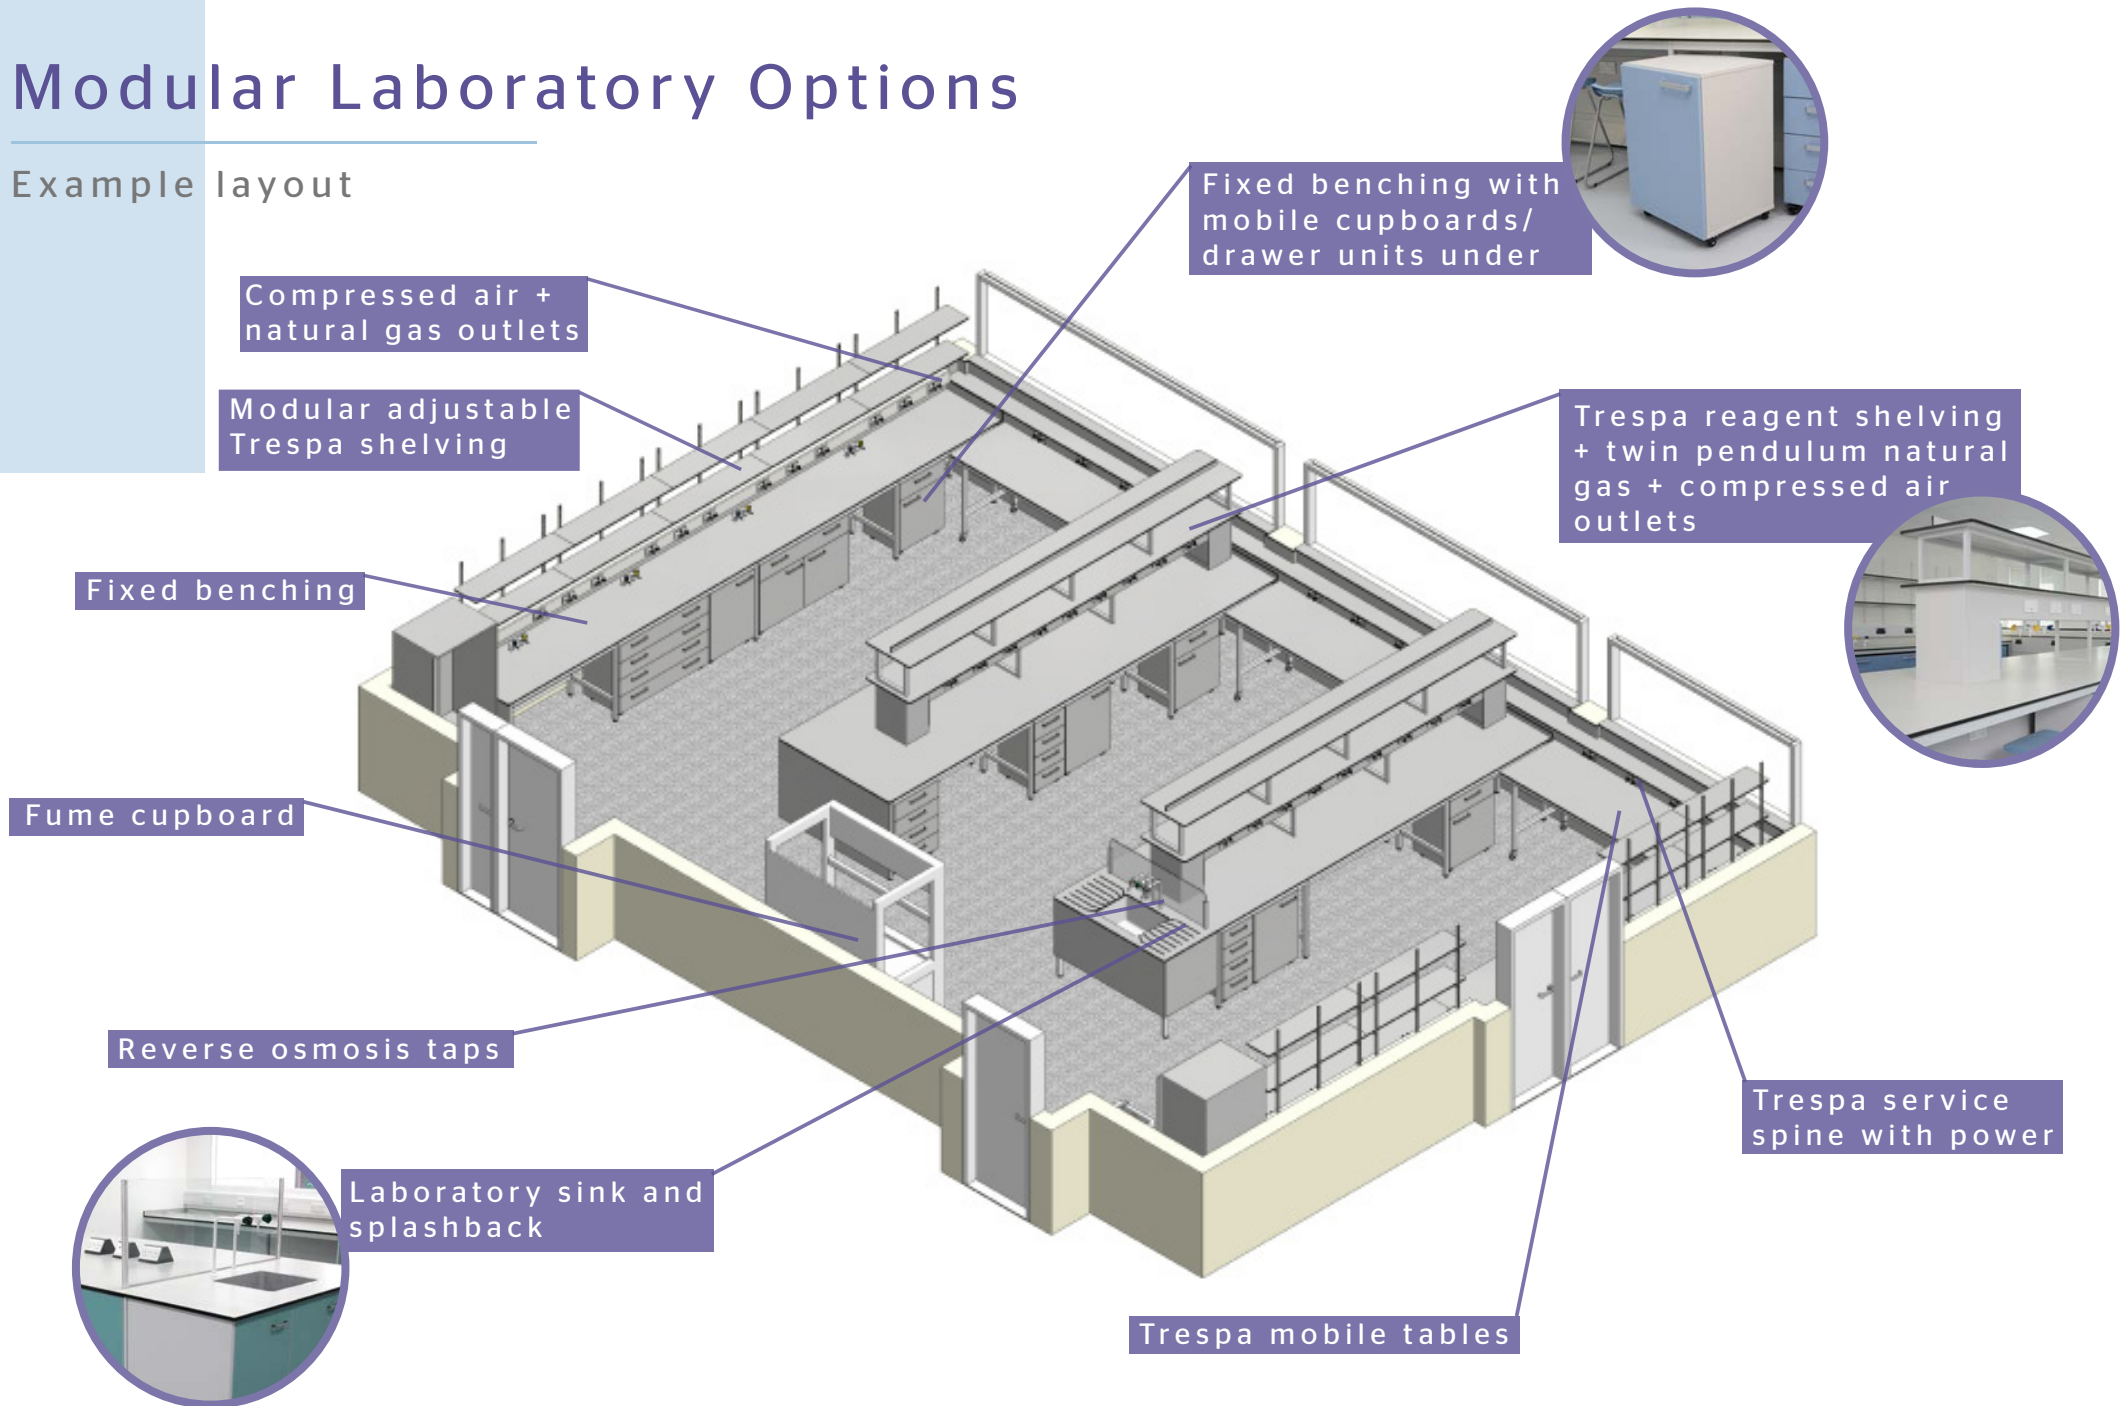

Our nationwide one stop shop solution offers the following benefits:

- Experienced designers and free design consultation - including 3D visuals
- Flexible service & UK manufacturing
- High calibre & proactive project management team
- Single point of contact throughout the project
- Robust and functional product design at an extremely competitive price
- Furniture installation or full refurbishment service

This service offers reassurance to clients seeking the convenience of one point of contact.

# Modular Laboratory Options

## Example layout

# Laboratory Design

High quality solutions tailored to your needs

Klick understand the demands that are placed on a busy lab and we design and fit furniture to meet those needs.

Our knowledgeable representatives will meet with you to understand how the laboratory runs day to day. This allows us to develop smart design solutions that will provide a streamlined and user-friendly workspace. We then make design suggestions and prepare a quotation for your consideration.

We can offer expert advice on the latest fittings and materials to create inspiring, state of the art laboratories, with functionality and flexibility as a priority.

- Over 40 years' experience in the design and installation of cutting- edge laboratory furniture
- Free design consultation with our laboratory expert to discuss your challenges
- Advice on layout and storage options to accommodate current processes, improve workflow and maximise efficiencies
- Latest Revit 3D visuals and walkthroughs to help you make the most informed decision
- Advice on HVAC and fume cupboards - our qualified engineers will assess your requirements and provide the perfect ventilation system for your lab
- Our furniture is robust and built to last - which avoids the need for frequent replacements and contributes to improved sustainability

# Scalable Laboratory Solutions

Flexibility is key in a modern laboratory

## 1. Start-Up

Small incubator labs for university spin-offs

## 2. Scale-Up

Mid sized labs for rapid reaction to expansion

# Mobile Laboratory Furniture

Including mobile furniture as part of your laboratory design will help to future proof the design, allowing for expansion in staff numbers or changes in processes.

## 3. Established Super labs for biotech or pharma businesses

Our mobile laboratory furniture systems have been designed to facilitate the changing needs of today's research and industrial laboratories.

Using modular cabinets and lab benching with flexible service solutions, it is possible to reconfigure your workspace with minimal disruption.

For maximum flexibility quick connect **service fittings** are available with a choice of outlet connections.

# Nationwide Fit Out Service

Flawless furniture solutions

Klick offers a first class service from receipt of the order through to completion, which includes:

- UK manufacture - high quality products delivered to schedule and on budget
- One point of contact throughout the project - avoiding communication issues
- Our designers and project management teams work closely together throughout the project to ensure accuracy of information
- Quality checks prior to despatch from our manufacturing and distribution facility
- Highly skilled fitters who are CSCS registered
- Prompt snagging and thorough aftercare service

Clear and precise information on project deadlines and programming with proactive management and installation teams who work with you to minimise disruption.

# Refurbishment

We Build Labs

“ ... Klick quickly assessed our current requirements and suggested design details to allow us to scale up our future manufacturing functions. Klick’s team were extremely professional throughout the project and simply got on with the job, they proactively raised any issues for discussion and were flexible in accommodating last minute changes. ”

Dan Hamilton - Manager Failure Analysis, Characterisation, Testing & Simulation, **AFC Energy PLC**

Klick Technology is one of the UK’s leading specialists in refurbishment services for laboratories.

- Our consultants are experts in the planning of all technical aspects and will work with you to develop a practical solution, compliant with lab standards
- Installation of humidity controlled environments and pressurised labs with the option of air handling, medical gases and cost effective HVAC solutions
- Efficient planning and management of tradesmen minimises time on site & keeps costs down
- Klick take full responsibility for all aspects of the project and co-ordination of the necessary contractors on site
- Less drain on management resources
- One point of contact from beginning to end of a project

# Worktops

Tried and tested robust materials

When selecting your work surface, it is important to consider both the functionality and aesthetic appearance. Our designers can offer advice about the most suitable benching option for your design and laboratory function.

TRESPA®

Trespa TopLab BASE is a non porous high-pressure compact laminate and is the ideal worktop material for most laboratory environments.

Trespa TopLab PLUS ALIGN is ideal for laboratory environments where hygiene and the avoidance of contamination are important. TopLab PLUS ALIGN is resistant to harsh chemicals and can be easily disinfected. ALIGN also has up to 85% bio-based carbon content for **improved sustainability**.

Velstone is a 25mm solid surface material which is non porous and has a smooth seamless surface with aesthetic appeal. Velstone helps to prevent the growth of bacteria and offers benefits in a sterile environment.
