
Anti Ligature and Dementia Range

 **DUDLEY**
INDUSTRIES
SHEET METAL EXPERTISE SINCE 1942

It's now possible to choose stylish and functional Anti-Ligature and Dementia washroom dispensers.

Choosing the right washroom products has never been more important during times of austerity but with the Safeguard Dudley Industries range, your choice of style is matched by robust functionality.

The innovative wall plate installation creates a recess that helps to reduce the potential for a ligature to be attached.

This creates safe and long wearing dispenser installations in your washroom areas and the rounded edges and angles go further to help avoid that institutional look and reduce injury risk.

Utilising the design credentials of the separate dispenser and wall plate makes the range also ideal for washrooms used by sufferers of dementia. The vibrant contrasting colours achieved by the white and blue help to identify the dispensers from the washroom décor sustaining the independence of users for as long as possible.

With an eye on mental health facilities, day centres, care homes, hospitals, detention centres, young offenders institutions, hospitals, prisons and courts our expert design team have created sector leading dispensers that work in all environments that can noticeably protect and enhance independence for some users.

To discover more about the washroom dispenser options available for your premises call our team on **+44 (0)1253 738311** or email us at sales@dudleyindustries.com
