

# Hand Hygiene Solutions

**How we view and undertake hand hygiene has changed forever in our post pandemic world. Covid-19 has shown us how important effective hand hygiene is across our whole society no longer just in healthcare and food preparations settings.**

We now need to provide robust, long term solutions to ensure our colleagues, customers and visitors have the ability to cleanse their hands at the point of need not just in the washrooms.

At Dudley Industries we have been designing and manufacturing washroom dispensers for over 70 years. We put our deep understanding of hygiene into each of our designs and manufacture them in our own production facility in Lytham St Annes, Lancashire. Our dispensers are fitted into some of the most prestigious washrooms around the globe.
