

reformedplastics

*Remoulding the Past, Reshaping the Future,
Rebuilding the Environment!*

About Us - Our Product

Due to the ever-increasing importance to recycle & protect the environment, our products are made from 100% recycled plastic. All the plastic used is recycled on-site and is a perfect alternative to wood. Our aim is to help rebuild the environment by utilising a commodity, which people would otherwise just throw away, and so turn what to some would be rubbish into a valuable product for everybody.

What can the plastic be used for?

The manufactured plastic has many practical and very useful properties. The main base of our products are in the form of planks and posts which can be used on their own for Garden Fences, both low for front gardens and high for side and back fences for instance, along roadsides, and around fields & paddocks just to name a few.

It is also possible to produce a number of other products out of our plastic, such as picnic tables. These would vary in size suitable for adults and children. Park benches, outdoor tables, square or rectangular plant boxes, decking and seating. The list is endless!

Why are recycled plastic products different?

Plastic lumber is the perfect alternative to anything that has ever needed maintaining.

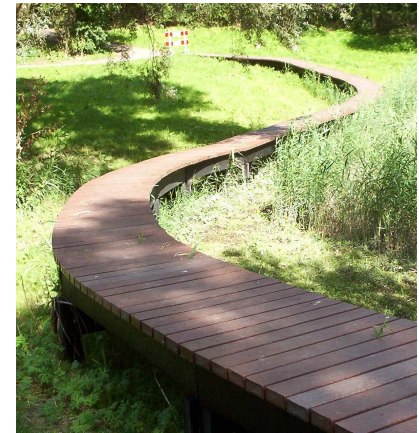

Plastic lumber can be cut with a regular saw, drilled, nailed, or screwed into, and routed as easily as wood.

- Does not rot.
- Will not need painting or staining.
- Strong, Durable & Wear resistant.
- Resistant to Vandalism.
- Resistant to Salt Water.
- Resistant to Insects & Bacteria.
- Does not split or splinter.
- Is completely maintenance free.
- It is graffiti resistant.
- Resistant to the elements.
- Resistant to chemicals.
- Will not break, even in extremely hot or cold conditions.

At Reformed Plastics all of our products are made from 100% locally sourced plastic waste which is recycled on site in our factory. Also, as-well as making our own products we are also Distributors for other UK manufactures. They are very well established companies which have been running for over 30 years.

They too make the same products as us plus many more besides.

Bollards

- The Bollards range contains a variety of designs:
- Bespoke design solutions can be created.
- Vandal-proof alternative.
- Maintenance free.
- Ideal solution for the safe and effective movement of pedestrians whilst restricting the movement of unwanted traffic.

Fencing

- Safe and secure solutions for pedestrian enclosures and traffic guidance.
- Sustainable sturdy alternative to timber.
- Maintenance free.
- Easy cleaning.

Outdoor Furniture

- Bespoke design solution.
- Sustainable sturdy alternative to traditional materials.
- Maintenance free.
- Easy cleaning.

Decking

- Standard colours, Black & Brown.
- Absolutely maintenance free.
- No splintering.
- Will never rot.
- Standard product is anti-slip, up to 85% more friction than hard wood when wet. (Leroux test NEN 2873)

Signage

- UK manufacture and design.
- Street signs, Information boards, Direction markers etc.
- Colour co-ordinated routing.

Construction

- Building cladding.
- Marina construction.
- Bridges.
- Reinforced solutions available.

reformedplastics

Landscaping

- Decking / Walk ways.
- Landing stages.
- Planting beds etc.

Play Areas

- UK design and build.
- Safe and secure with no splintering.
- Maintenance free.
- Easy cleaning.

Eco-Grid

- Tough, flexible and easy to install ground reinforcement system
- Green parking areas with clear demarcation.
- Ground reinforcement.

Eco-Sheet

- Tough and easy to clean.
- Multi application.
- Anti-vandal.
- A range of colours and textures.

A Real Solution for a Sustainable Community

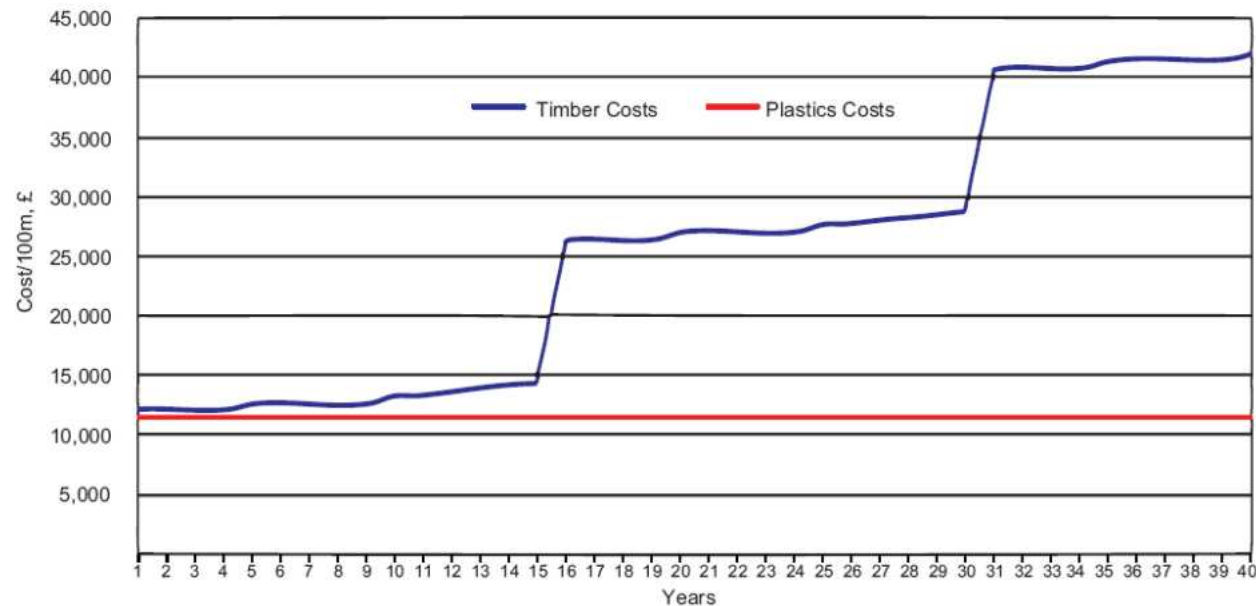

Is it more expensive than wood?

No. The initial amount payable is more than wood, but our products are an investment as they never need to be replaced. When the costs of replacing fencing or garden furniture, both wooden and metal, due to corrosion, fatigue or natural deterioration plus maintenance materials are taken into consideration, solid plastic lumber and furniture quickly pays for itself and in the long run saves a lot of time and money.

Financial benefits.

Achieving value for money is a key driver for any purchasing decision. Although some recycled products have greater up-front costs, their longevity and durability make them a more cost-effective option over the long term.

Recycled plastic products can offer savings of up to 50% per annum in whole life costs over a period of 40 years.

In Conclusion.

The ethos and motivations of our company are;

"Remoulding the Past, Reshaping the Future, Rebuilding the Environment!"

- Basically, the facts being, if we can help towards the prevention of unnecessary tree logging, and minimise the amount of plastic waste going into landfill, we then begin to find ourselves a *Green* 'Win Win' Solution!
- As I've already mentioned, at Reformed Plastics all of our products are made from 100% locally sourced HDPE & PP plastic waste which is recycled on site in our factory. We manufacture the products ourselves and then sell direct to the Domestic and Commercial sector.
- Our plastic has a very wide range of different uses, some of which being are as gates, fencing, outdoor furniture, decking and landscaping, bollards, play areas, sea defences and construction etc. The long term advantages it has over traditional materials are staggering!
- I strongly believe in our products and services and those we can provide you, with a solution that will cater to your requirements.
- I hope that you will find this information helpful, constructive and enlightening into our products, which you can also find on our website at www.reformedplastics.co.uk, and if you would like to get back in touch with us, I'm positive we can help you further.
