

A simple, reliable internet connection

To make the most of this new technology, a reliable connection is vital. With a reliable connection in and out of the classroom, the learning can continue, enabling students to take control of their education through unrivalled access to global information on the internet. Plus, by embedding state-of-the-art cyber security solutions, IT teams, teaching staff and parents can be confident that this is taking place in a safe and secure environment.

Bespoke telecoms service for education

In an education setting, telecoms is more than just phone lines. Our experienced team can help you put together a bespoke solution for your setting, including;

- High speed internet and Wi-Fi
- Staff mobile contracts
- Cyber security software
- Hosted phone systems
- Web filtering
- Automated absence reporting
- Anti-bullying lines/systems
- Call recording
- VPN remote access
- Printing networks
- Building access and security systems
- Lift intercoms
- Remote devices and access

Along with the required project management team to ensure successful implementation and training.

WORKING ALONGSIDE THE BEST

Achieving your Telecoms Vision

A changing landscape

At Immervox we understand that the way you teach is changing. As the digital landscape continues to develop at an eye-watering rate, it's important that any infrastructure investments are flexible and sustainable for global learners of today and tomorrow.

Now more than ever, Higher Education settings are relying heavily on their telecoms and connectivity infrastructure, and as trusted advisors in this industry for over 30 years, Immervox provides cost-effective, reliable internet and telephony services for schools, colleges, and universities across the UK. We create bespoke solutions that enable reliable Wi-Fi and phone services that stay in budget.

- **We're independent**
- **We're not tied to a single network or supplier, so our advice is totally unbiased**
- **We're service-focused**
- **We provide support and advice 24/7, 365 via our UK Helpdesk**

96% of teaching professionals believe technology has a positive impact on the way students participate and learn.

Proven experts in the education sector

As part of our ongoing work with a top tier UK University, experienced Immervox project managers are working alongside University IT Teams on the development of a brand new state-of-the-art campus.

The new campus will offer some never-seen-before courses, and to accommodate this requires some of the most advanced telecoms, IT and AV technology in the world. As established and trusted telecoms and connectivity experts, Immervox were brought in to Project Manage the design, procurement, installation and commissioning of all telecoms, IT and AV infrastructure and equipment.

The new IT infrastructure was designed and installed in a way that not only supports this plethora of devices from high student turnover, but supports them in a secure and cyber-safe way using market-leading tools and technology. As a University that welcomes overseas students, it is vital that the IT infrastructure is secure, to keep staff and students, and their personal information, safe online across the world.

While many universities struggle with ageing IT infrastructure, at Immervox we know that a strong foundation creates the best ecosystem for learning, growth and development, and this was fundamental to the installation on this project. As one of the country's most trusted communications providers, Immervox were able to provide project managers with the expertise and range of knowledge to ensure the scale and level of precision could be accurately met.
