

CASE STUDY

LONGWILL SCHOOL - B31 1LD

SOVEREIGN
Bringing Imagination into Play

Longwill Early Years had put up with an old and mixed surface area for a long time and the area was in great need of a makeover. Budgets being what they are, the school had to wait another year until all finances were in place from their preferred dates but the changes were very much worthwhile. The old surface was a mix and at different heights, We took the old surfaces out and installed a bright wet pour surface to the whole area at the same depth which the children and the staff love. To enhance this, we were able to do an adjacent area in Artificial grass with a fence sectioning the area off so that the children had a quiet space to use as well rather than a gravel surface as it was before. All in all, the transformation was a delight and well worth the wait.

>> FEEDBACK

Why did you choose Sovereign for the Project?

"We chose Sovereign for our project based on the previous positive experience we had for another project we used them for. We were looking for that personal touch in delivering what we wanted to a high standard and with Sovereign we definitely received this."

What made Sovereign's design better than any others you received?

"The design plans were presented to us exactly how we wanted them to be down to the finer more bespoke details of the project we requested."

How did you find the design process?

"The design process was delivered in a professional manner and was made all the more reassuring following a site visit from Andy Latham the sales area manager who talked us through the process and responded to all our queries via both email and telephone in a timely and helpful way."

How did you find the installation process?

"The installation was carried out to an excellent standard by a team of professional, approachable and customer focussed operatives. Completion targets for the project were upheld and discussed throughout the process despite some challenging days with bad weather."

"As happy customers of Sovereign following previous successful projects, we didn't hesitate in seeking their expertise again when deciding to renew and modernise our Foundation play area. From the initial site consultation and planning, through to the Pre and post installation of the finished project, the entire team at Sovereign were very professional, personable and customer-centric. Seeing the finished project in all its glory and the children now enjoying what was a tired looking area, is great to see and the feedback from the staff who work with these children has been extremely positive. We would 100% recommend to anyone that Sovereign as a company can deliver on quality and customer satisfaction."
