

CASE STUDY

GREENWAYS PRIMARY SCHOOL – SS13BS

SOVEREIGN
Bringing Imagination into Play

The School have four existing play spaces. Many years ago we installed play equipment and surfacing in two of them. When I was invited back in to visit site I noticed the existing areas were very tired and in need of something more exciting and challenging for the children.

The other two areas were sparse and in need of a revamp. On my return, I visited Theresa, the Head teacher, she said that she wanted to focus on three of the spaces.

We discussed her specific needs and I went away to prepare plans, 3D images and an accurate quotation.

The following week the plans were tweaked to provide exactly what she wanted.

An order then ensued, with a pre installation survey to follow, this ensured that there were no issues at installation point. The work was then scheduled and duly completed on time.

"It was a very positive experience for us. Really great interaction with the company, as well as every member from the director to the people that came in and installed it, even the health and safety experts as well. They were really supportive in our ideas, but also in being able to support us with our vision and making that come to light."

Theresa Goodrich

Headteacher
