

# CASE STUDY

SAINT PATRICKS CATHOLIC PRIMARY SCHOOL— CA25 5DG

**SOVEREIGN**  
Bringing Imagination into Play

Saint Patrick's School wanted to upgrade their current tarmac yard into a safe, high-quality sports area. They wanted to promote an active, healthy lifestyle for students while enhancing the school's reputation and connection with the community through their facilities. We discussed the options on available surfacing and it was advised/decided to go with the needlepunch sports carpet. This material is designed to absorb impact and provide better grip, which allows their pupils to enjoy their favourite sports with a reduced risk of injury.

With reliable and consistent playing conditions, pupils can play and learn for longer and in a safer environment, which might lead to more wins and personal achievements. Plus, this surfacing makes everything look appealing, attracting pupils and families alike. In short, investing in the sports surfacing was a win-win for Saint Patrick's!

» "Overall, it was a great service, Katy was very helpful as were the fitters! Even when we raised a snagging issue to Sovereign, they were quick to respond and arrange the resolutions!"
