

CASE STUDY

SLATED ROW SCHOOL — MK12 5NJ

SOVEREIGN
Bringing Imagination into Play

We were asked to create an exciting, imaginative, colourful and challenging new play area for children at Slated Row School with varying levels of both age and ability.

We installed a fantastic roadway area for bikes and scooters with a bridge, speed bumps and a roundabout and mini mound in the middle. For the older and more able children our amazing Sahara climbing frame in school blue colours which offers a wide variety of activities and also a fun basket swing and DDA swing for those less able to enjoy. There were further areas of artificial grass and toadstool seating and music instruments for the children to be creative and enjoy. The school were delighted with the project from start to finish and the children love their new play areas.

» FEEDBACK

Why did you choose Sovereign for the Project?

"I Loved the design and how quick Sovereign were with making changes and suggesting solutions to make our playground a better environment."

What made Sovereign's design better than any others you received?

"It was very creative, listening carefully to ideas and thoughts of what we wanted. Engaged with our students voice to ensure their views were also included."

How did you find the design process?

"Very efficient and easy to work with."

How did you find the installation process?

"Excellent and any small concern was immediately rectified."

» "I would 100% work with Sovereign again and fully recommend it to other schools. Justin Mottaz in particular was extremely professional, proactive and passionate about our school having a playground which was valuable for many and makes our students happy."
