Protectapeel is a **spray-on temporary protective coating** designed to protect surfaces from damage during construction.

Protectapeel forms an **air-tight protective bond** to non-porous surfaces. When required, the coating is easily removed by hand peeling - revealing **clean and undamaged surfaces**.

**Protectapeel prevents the need for repairs, replacements and additional cleaning.**

## WHY CHOOSE PROTECTAPEEL

Quickly applied by airless spray gun, Protectapeel requires no measuring or cutting to size.

Protectapeel does not lose adhesion so there is no need to replace it during the build process.

Protectapeel protects for up to 12 months, when removed the surfaces are clean and undamaged allowing you to hand over on time.

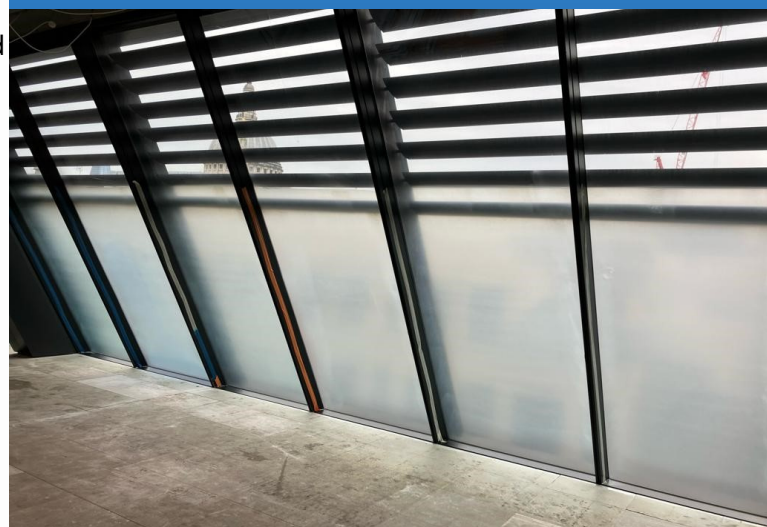

All dust, dirt, paint etc. is removed with the coating - reducing additional cleaning costs by at least 30%

Protectapeel can also be returned for free\* for recycling!

\*A minimum of 50kg of used material is required for free collection

I contacted for a Protectapeel quote and Lukasz called to ensure we got the required products and swiftly followed up with a quote. Deliveries always arrived on-site when requested. To date the customer service received has been excellent. Lukasz is easy to reach and always happy to help. I have no doubt this will continue through to the end of the project, and on to the next projects.

## WHAT OUR CUSTOMERS SAY

PROBABLY ONE OF THE BEST PRODUCTS THAT I HAVE USED IN A LONG TIME. I SPRAYED IT ON BEFORE ANY TRADES WERE IN AND PEELED IT OFF WHEN EVERYBODY HAD FINISHED. PERFECT FOR THE LIGHTING AS WELL, IT LETS ENOUGH LIGHT IN SO EVERYBODY CAN CONTINUE WORKING

**MCMULLEN FACADES LTD**

“The protective coating is really easy to apply and much better than alternative surface protection available.

The customer service exceeded my expectations.

The representative was not only helpful but also took the time to explain things thoroughly.

It's rare to find such dedicated and customer-centric service these days. Thank you for your excellent support!”
