

ENERGYST, LEEDS

TWO STOREY MODULAR BUILDING

"A very slick process from delivery to invoice with a minimum of disruption on installation. A professional service in both areas"

Dean Harris, Depot Manager

After a previous successful project, Energyst had no hesitation in turning to Britcab for a refurbished modular building for their offices in Leeds.

Britcab provide a two storey modular building which was delivered directly to site from a construction site in London. The building was refurbished and modified on site to the agreed layout and specification, completed on time and to the full satisfaction of the client.

The building includes welfare facilities to the ground floor with canteen, WC's and shower room. An internal staircase leads to an open plan office on the first floor with WC's, kitchen, meeting room and Manager's office.

The depot often get compliments from visitors on the quality of their office complex.

LEEDS UNITED, LEEDS

CEDAR CLAD 9.6M X 18M 12 BAY TWO STOREY MODULAR BUILDING

The Summer of 2018 was a time of significant change at Leeds United Football Club as they invested heavily in world renowned Head Coach Marcelo Bielsa.

One of the first tasks for the new coach was to establish an office complex at the training ground in Thorp Arch so his staff and players could cope with the extra training sessions he was demanding.

After obtaining a number of quotes, Britcab were selected to provide the building which consisted of a second hand 5 on 5 Modular complex, refurbished, modified and clad in brand new Cedar externally.

The building was refurbished on site and on time to the Clubs bespoke specification.

We are extremely proud to be working so closely with such an historic club and it surely cant be a coincidence that our Modular complex has preceded an upturn in the clubs form.....
